Date:	Friday, June 17, 2022 10:52:25 AM

I tracked down the origin of the name Acer Park. It is in reference to the genus name of Maple trees. There are a number of maples of various types on the parcel and it is just to the south of Sugar Maple Park. Hence, the name.

Subject: Three New Park Names

The purpose of this memo is to inform you that Parks is currently in the master planning process for these parks and will, during the master planning process, officially adopt the following names.

- Birchwood South Park: Located at 10305 Hazy Sky Parkway, the park name reflects the name of the plat in which it is located, plus the word "south" to indicate its location in the southern area of the plat.
- Acer Park: Located at 10327 Shady Birch Trail. I am currently researching the reasoning behind this name.
- Acacia Ridge Park: Located at 9251 Watts Road, the park name reflects the name of the plat.

The Long Range Planning Committee will consider these names at the June 22, 2022 meeting.

Please let me know if you have any questions or concerns.
