Please respect individuals right to informed consent. A 2014 study has been published on contaminants found in the hydrofluosilicic acid most cities use for their programs. All samples contained arsenic and suprising amounts of aluminum. Many samples also contained lead. Israel banned water fluoridation in August stating that it is not safe for pregnant women, kidney patients, and those suffering thyroid disorders. Dublin, Ireland halted the program two weeks ago. Peel Ontario Canada is currently involved in a lawsuit by concerned citizens stating that water fluoridation violates the safe drinking water act and constitutional rights. Does Madison Water Utility have a warning for parents stating to not mix infant formula using fluoridated tap water? Read the national research council's 2006 review of water fluoridation.
