For the Record. I'm writing this letter to notify the Madison Water Utility asking them to revoke ALL water fluoridation ordinances. We the People want clean water not fluoridated water which is toxic to human health. The CDC research shows that "fluoride harms the health of thyroids, kidneys, infants, and bones with osteopena/osteoporosis, in multiple ways as well as causing fatal teenage male osteosarcoma. These are not speculations, but proven scientifically by studies and overwhelming evidence. In 2008 the (former) National Academy of Sciences had its National Research Council do the 1st global state of the art fluoride study on health effects, and the results for the first time in history translated all studies into American language and the facts were compiled showing fluoride's massive harms around the world in various circumstances, but impacting adversely almost all body functions, disrupting endocrine system and immune system, and cognitive function. The CDCs data shows American blacks to have significantly higher dental fluorosis than whites, 58% to 36%, based on 1994-2004 NHANES data which is highly regarded data". This basically destroys the dentists (who do not have internal medicine training) argument that it is needed to prevent tooth decay/rotting teeth/cavities which is an outright lie sold to the public.

Again, completely STOP all water fluoridation which does NOT prevent rotting teeth as claimed by dentists. Kidney patients should not be drinking it. Mothers should not be using this poisonious water to mix infant formula. Fluoride lowers thyroid function.

Thank you,
Leslie Bruce
