To members of the Transportation Commission,

As a resident of Hammersley Road, I urge you to approve the proposed redesign featuring a separated bike/pedestrian path. This section of road is dangerous for pedestrians and cyclists and is essentially a barrier preventing non-motorized movement through the Orchard Ridge neighborhood. This road is identified in the master plan as needing sidewalks. I understand there are concerns about the loss of on-street parking for occasional get-togethers, but please do not put subsidized vehicle storage ahead of human safety and mobility.
