## Introduction

The City of Madison's Urban Design Commission (UDC) has been created to:

- Encourage and promote high quality in the design of new buildings, developments, remodeling, and additions so as to maintain and improve the established standards of property values within the City.
- Foster civic pride in the beauty and nobler assets of the City, and in all other ways possible assure a functionally efficient and visually attractive City in the future.

## Types of Approvals

There are three types of requests considered by the UDC:

- Informational Presentation. A request for an Informational Presentation to the UDC may be requested prior to seeking any approvals to obtain early feedback and direction before undertaking detailed design efforts. Applicants should provide details on the context of the site, design concept, site and building plans, and other relevant information to help the UDC understand the proposal and provide feedback. (Does not apply to CDR's or Signage Modification requests)
- Initial Approval. Applicants may, at their discretion, request Initial Approval of a proposal by presenting preliminary design information. As part of their review, the Commission will provide feedback on the design information that should be addressed at Final Approval stage.
- Final Approval. Applicants may request Final Approval of a proposal by presenting all final project details. Recommendations or concerns expressed by the UDC in the Initial Approval must be addressed at this time.

## Presentations to the Commission

The Urban Design Commission meets virtually via Zoom, typically on the second and fourth Wednesdays of each month at 4:30 p.m. Applicant presentations are strongly encouraged, although not required. Prior to the meeting, each individual speaker is required to complete an online registration form to speak at the meeting. A link to complete the online registration will be provided by staff prior to the meeting. Please note that individual presentations will be limited to a **maximum of three (3) minutes**. The pooling of time may be utilized to provide one speaker more time to present, however the additional time will be based on the number of registrants from the applicant team, i.e. two (2) applicant registrants = six (6) minutes for one (1) speaker.

Primarily, the UDC is interested in the appearance and design quality of projects. Emphasis should be given to the site plan, landscape plan, lighting plan, building elevations, exterior building materials, color scheme, and graphics. Please note that presentation slides, in a PDF file format, are required to be submitted **the Friday before** the UDC meeting.

Re: St. Matthews New Life Church Request for Sign Variance

Dear Urban Design Commission:

Over the course of the last year, my company and the board of St. Matthews New Life Church have worked to design a new monument sign for the church. The proposed design is for a sign measuring eight (8) feet by three (3) feet and is double-sided, for a total graphics area of forty-eight (48) square feet (24 feet per side). The current zoning allows for a sign that is up to thirty-two (32) square feet and we request by application of this permit a larger allowance for signage so that it may be visible from the roadway.

***31.043 (2) (a) Is necessary for a sign located on the site of an establishment to be identifiable and legible from the nearest roadway at prevailing speeds; and***

St. Matthews Church sits above Cottage Grove Road and faces a two-lane roadway. The speed limit on that roadway is 50 MPH. As of now, the current monument sign is not visible from the roadway. The size of the current sign is 27.5' per side and in closer proximity to the church's parking lot which is about 200' from the roadway. We propose to move the sign closer to the roadway, placed 70' from the roadway or 49' from the property line and make it larger so that the church's sign is visible to passersby.

Without allowance of the larger sign, St. Matthews is not able to effectively give notice of location for their current members and visitors, especially during the dark hours of morning and evening travel, as it is difficult to navigate the church's location or entrance with the current nonilluminated signage.

***31.043 (2) (b) Will result in a sign more in scale with the building and site and in a superior overall design.***

The Church has a frontage of five hundred fifty-two (552) feet and overall site is 20 acres. Given this size of property the larger signage would be more in proportion to the property than the current smaller sign that is not visible.

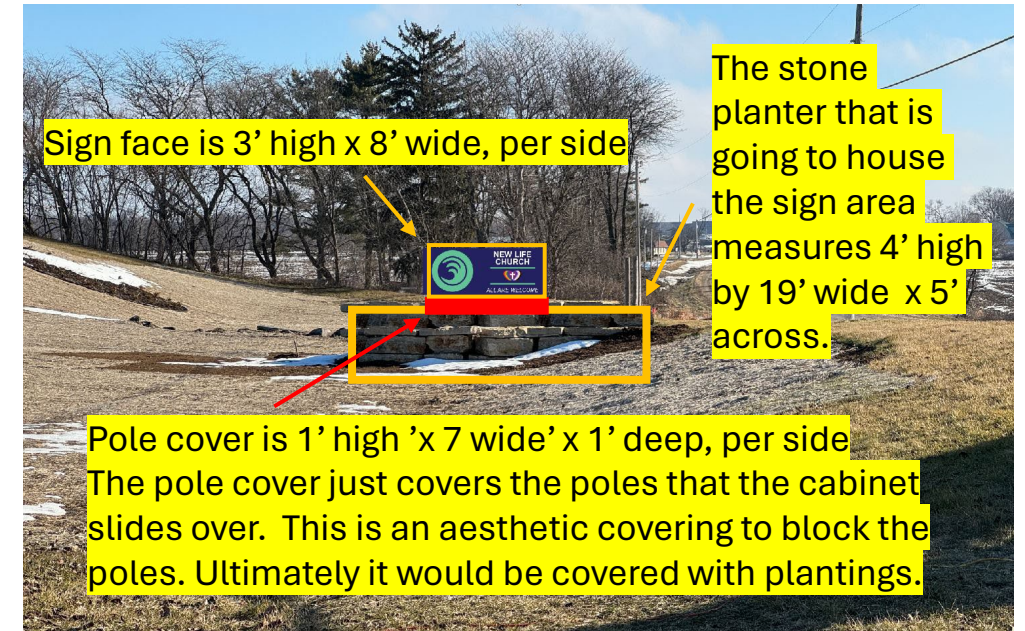

Please consider approval for the proposed design so that St. Matthews New Life Church is able to have signage visibility from the roadway.

Thank you,

*Sara Mork*
