

PREPARED FOR THE LANDMARKS COMMISSION

Project Name & Address: 1330 Sherman Ave - Demolition of an existing beach shelter and construction of a new beach shelter on a Designated Madison Landmark site (Tenney Park); 2nd Ald. Dist.

Application Type(s): Informational Presentation

Legistar File ID # [64336](#)

Prepared By: Heather Bailey, Preservation Planner, Planning Division

Date Prepared: March 9, 2021

Background

Madison Parks is looking to replace the existing shelter on the beach at Tenney Park. The existing structure is noncontributing to the landmark designation and was constructed in 1970. As a designated landmark property, the proposed new construction must meet the Secretary of the Interior’s Standards for Rehabilitation.

Tenney Park is significant for its Prairie style landscape architecture, as designed by O.C. Simonds and developed from 1900-1911. The seven contributing structures at time of designation were the concrete-clad Prairie style restroom building and six bridges: Martson bridge, A.G. Zimmerman bridge, two concrete bridges, two concrete bridges, Sherman Avenue bridge, and the Thornton Avenue spillways rustic style bridge. The noncontributing structures were described in the nomination as: “all rustic in design, in keeping with the park’s character, and do not compromise the integrity of Tenney Park” (p. 5, Tenney Park landmark nomination form)

This informational presentation allows the Landmarks Commission to provide their feedback on how the proposed development could align with the applicable standards that the commission will use to review the project. Below are those standards:

- 41.18 STANDARDS FOR GRANTING A CERTIFICATE OF APPROPRIATENESS.** A certificate of appropriateness shall be granted only if the proposed project complies with this chapter, including all of the following standards that apply.
- (1) New Construction or Exterior Alteration. The Landmarks Commission shall approve a certificate of appropriateness for exterior alteration or construction only if:
 - (b) In the case of exterior alteration or construction of a structure on a landmark site, the proposed work would meet the Secretary of the Interior's Standards for Rehabilitation.
 - (d) In the case of any exterior alteration or construction for which a certificate of appropriateness is required, the proposed work will not frustrate the public interest expressed in this ordinance for protecting, promoting, conserving, and using the City's historic resources.
 - (2) Demolition or Removal. In determining whether to approve a certificate of appropriateness for any demolition or removal of any landmark or structure within a historic district, the Landmarks Commission shall consider all of the following, and may give decisive weight to any or all of the following:
 - (a) Whether the structure is of such architectural or historic significance that its demolition or removal would be detrimental to the public interest and contrary to the general welfare of the people of the City and the State.
 - (b) Whether a landmark's designation has been rescinded.
 - (c) Whether the structure, although not itself a landmark structure, contributes to the distinctive architectural or historic character of the historic district as a whole and therefore should be preserved for the benefit of the people of the City and the State.

- (d) Whether demolition or removal of the subject property would be contrary to the policy and purpose of this ordinance and/or to the objectives of the historic preservation plan for the applicable historic district as duly adopted by the Common Council.
- (e) Whether the structure is of such old and unusual or uncommon design, method of construction, or material that it could not be reproduced or be reproduced only with great difficulty and/or expense.
- (f) Whether retention of the structure would promote the general welfare of the people of the City and the State by encouraging study of American history, architecture and design or by developing an understanding of American culture and heritage.
- (g) The condition of the property, provided that any deterioration of the property which is self-created or which is the result of a failure to maintain the property as required by this chapter cannot qualify as a basis for the issuance of a certificate of appropriateness for demolition or removal.
- (h) Whether any new structure proposed to be constructed or change in use proposed to be made is compatible with the historic resources of the historic district in which the subject property is located, or if outside a historic district, compatible with the mass and scale of buildings within two hundred (200) feet of the boundary of the landmark site.

Prior to approving a certificate of appropriateness for demolition, the Landmarks Commission may require the applicant to provide documentation of the structure. Documentation shall be in the form required by the Commission.

Secretary of the Interior's Standards for Rehabilitation

1. A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces and spatial relationships.
2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces and spatial relationships that characterize a property will be avoided.
3. Each property will be recognized as a physical record of its time, place and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.
4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.
5. Distinctive materials, features, finishes and construction techniques or examples of craftsmanship that characterize a property will be preserved.
6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.
7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
8. Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.
9. New additions, exterior alterations or related new construction will not destroy historic materials, features and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.
10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.
