Overview

The intent of the project is to create affordable workforce housing for those that want to live in downtown. The means by which we achieve this is thru A.) land use density, and B.) a design that maximizes efficiency while not sacrificing functionality. We believe that there is a strong need to not only provide this type of housing but to create a meaningful sense of place.

The proposed redevelopment of 139 West Wilson is a demolition of the existing multi-unit housing development and off-street parking and the creation of 332 residential units. The redevelopment proposal includes 6 on site vehicles as part of an on-demand use program. It will provide parking stalls to those that need or want them in the Dane county ramp. The site is in the Urban mixed-use (UMX) district and falls under the Capitol view preservation limit. The UMX does not require off street parking.

The UMX District is intended to provide opportunities for high-density residential and office uses in combination with limited retail and service uses designed to serve the immediate surroundings. The proposed use will require a conditional use approval since it is greater than 4 dwelling units. Currently we plan on submitting for UDC Final and a Land use application on August 22 for public hearings on October 12th, and October 24th respectively.

Project Data

Lot Area:	17,218.4 SF / .39 acres
Dwelling units:	332 D.U.
Lot Area/D.U.	51.8 SF/D.U.
Building footprint:	9,840 SF
Gross Square footage:	156,633.5 GSF
Number of stories:	16
Major Building Height:	163.8'

Height: Max height for this proposal given MGO 28.134 (3) - Capitol View Preservation. City datum @ 0'-0" is established per code at 845.6'. From there to top of column capital at rotunda, code provides max height of 187.2' above datum. The sum of these is 1032.8'. Our spot elevation at front, center of sidewalk is 869.0'. Max height is 1032.8' - 869' = 163.8'.

Design materials, Door and window openings: Our street facing façade door and window openings comprise 72% of the façade area. The glass on all windows and doors shall be slightly tinted to allow views into and out of the interior. The primary exterior material will be an highly durable acid etched concrete, with a custom faceted profile. The faceting will occur on all facades. The facets incorporate a horizontal and vertical articulation and twist within each unit, creating a pattern and texture change throughout the façade.

Recessed art façade: We are also proposing an recessed entry condition with a 51 feet tall, L-shaped (10' x 20') wide, backlit art wall. The art images would be color jet printed on 4' x 10' dibond composite panels, mounted behind lit translucent dual wall poly carbonate panels. The installation would be interchangeable on periodic basis by soliciting emerging Wisconsin artists

Parking: Per the ordinance there is no minimum car parking required. However, we will be providing 6 on site car stalls with charging stations. Bike parking per ordinance requires 332 stalls for residences and 33 for guests. We are providing 298 indoor secured parking stalls for residences and 16 exterior stalls for guests.

Resident amenities: Fitness center, outdoor garden for residences, 1 laundry room per floor, Mail and secure package room, Community room, and an onsite remote work center.

Design Development Team: 139 West Wilson LLC

Thank you in advance and we look forward to hearing your thoughts about this proposal.

Sincerely,

A handwritten signature in black ink, appearing to read "John Seamon". The signature is fluid and cursive, with the first and last names clearly legible.

JSD PROJECT NO: 22-11487

LANDSCAPE CALCULATIONS AND DISTRIBUTIONS

Required landscaped areas shall be calculated based upon the total developed area of the property. Developed area is defined as that area within a single contiguous boundary which is made up of structures, parking, driveways and docking/loading facilities, but excluding the area of any building footprint at grade, land designated for open space uses such as athletic fields, and undeveloped land area on the same zoning lot. There are three methods for calculating landscape points depending on the size of the lot and Zoning District.

(A) For all lots except those described in (B) and (C) below, five (5) landscape points shall be provided for each three hundred (300) square feet of developed area.

Total square footage of developed area: 17,165
 Total landscape points required: 58

(B) For lots larger than five (5) acres, points shall be provided at five (5) points per three hundred (300) square feet for the first five (5) developed acres, and one (1) point per one hundred (100) square feet for all additional acres.

Total square footage of developed area: _____
 Five (5) acres = 217,800 square feet
 First five (5) developed acres = 3,630 points
 Remainder of developed area: _____
 Total landscape points required: _____

(C) For the Industrial - Limited (IL) and Industrial - General (IG) districts, one (1) point shall be provided per one hundred (100) square feet of developed area.

Total square footage of developed area: _____
 Total landscape points required: _____

Subject: 139 West Wilson status

Hello Mike,

I hope this not finds you well. We have been able to find a path forward for the design and development of 139 West Wilson. We are looking for another opportunity to meet with you and the neighborhood association to share our current proposal. Right now, our plan is to have a UDC Initial hearing on July 27th. Then based on feedback from you and UDC we would plan on submitting for UDC Final and a Land use application on August 22 for public hearings on October 12th, and October 24th respectively. Please let me know, if I should reach out to Jonathon directly to establish a place on the agenda for the next available neighborhood meeting. Thanks in advance.

Best-John
