Madison building department
Development service center

Subject: Letter of intent to start construction prior to building permits beings issued

To whom it may concern,

I am writing this letter to notify Madsion's building department of my intentions. I would like to demo my old existing garage , cut concrete, replace it with new concrete, and build a new garage. I already have everything set up to begin construction as soon as I am given the permits to begin construction.

This is the reason I am sending you this letter of intent for when the application to begin construction is reviewed, Madison's building department can contact me to begin work.

Sincerely,
Alex Stoik
