UDC

City of Madison
Planning Division
Madison Municipal Building, Suite 017
215 Martin Luther King, Jr. Blvd.
P.O. Box 2985
Madison, WI 53701-2985
(608) 266-4635

FOR OFFICE USE ONLY:

Paid _____ Receipt # _____

Date received _____

Received by _____

Aldermanic District _____

Zoning District _____

Urban Design District _____

Submission reviewed by _____

Legistar # _____

Complete all sections of this application, including the desired meeting date and the action requested.

If you need an interpreter, translator, materials in alternate formats or other accommodations to access these forms, please call the phone number above immediately.

1. Project Information

Address: _____

Title: _____

2. Application Type (check all that apply) and Requested Date

UDC meeting date requested _____

New development

Alteration to an existing or previously-approved development

Informational

Initial approval

Final approval

3. Project Type

Project in an Urban Design District

Project in the Downtown Core District (DC), Urban Mixed-Use District (UMX), or Mixed-Use Center District (MXC)

Project in the Suburban Employment Center District (SEC), Campus Institutional District (CI), or Employment Campus District (EC)

Planned Development (PD)

General Development Plan (GDP)

Specific Implementation Plan (SIP)

Planned Multi-Use Site or Residential Building Complex

Signage

Comprehensive Design Review (CDR)

Signage Variance (i.e. modification of signage height, area, and setback)

Signage Exception

Other

Please specify

4. Applicant, Agent, and Property Owner Information

Applicant name _____

Company _____

Street address _____

City/State/Zip _____

Telephone _____

5. Required Submittal Materials

Application Form

Letter of Intent

- If the project is within an Urban Design District, a summary of how the development proposal addresses the district criteria is required
- For signage applications, a summary of how the proposed signage is consistent with the applicable CDR or Signage Variance review criteria is required.

Development Plans (Refer to checklist on Page 4 for plan details)

Filing fee

Electronic Submittal*

Notification to the District Alder Previously submitted with Initial UDC application. Email communication with Alder Verveer is ongoing. Neighborhood meeting took place on November 10, 2022.

- Please provide an email to the District Alder notifying them that you are filing this UDC application. Please send this as early in the process as possible and provide a copy of that email with the submitted application.

Each submittal must include fourteen (14) 11" x 17" **collated** paper copies. Landscape and Lighting plans (if required) must be **full-sized and legible**. Please refrain from using plastic covers or spiral binding.

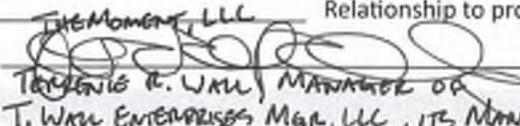

Both the paper copies and electronic copies must be submitted prior to the application deadline before an application will be scheduled for a UDC meeting. Late materials will not be accepted. A completed application form is required for each UDC appearance. Per conversation with Jessica Vaughn an electronic submittal is acceptable. No paper copies are being submitted unless requested. For projects also requiring Plan Commission approval, applicants must also have submitted an accepted application for Plan Commission consideration prior to obtaining any formal action (initial or final approval) from the UDC. All plans must be legible when reduced.

**Electronic copies of all items submitted in hard copy are required. Individual PDF files of each item submitted should be compiled on a CD or flash drive, or submitted via email to udcapplications@cityofmadison.com. The email must include the project address, project name, and applicant name. Electronic submittals via file hosting services (such as Dropbox.com) are not allowed. Applicants who are unable to provide the materials electronically should contact the Planning Division at (608) 266-4635 for assistance.*

6. Applicant Declarations

1. Prior to submitting this application, the applicant is required to discuss the proposed project with Urban Design Commission staff. This application was discussed with _____ on _____.
2. The applicant attests that all required materials are included in this submittal and understands that if any required information is not provided by the application deadline, the application will not be placed on an Urban Design Commission agenda for consideration.

Name of applicant Kirk Keller Relationship to property Architect

Authorizing signature of property owner  Date April 10, 2023

T. WALL ENTERPRISES MGR, LLC, ITS MANAGER

7. Application Filing Fees

Fees are required to be paid with the first application for either initial or final approval of a project, unless the project is part of the combined application process involving the Urban Design Commission in conjunction with Plan Commission and/or Common Council consideration. Make checks payable to City Treasurer. Credit cards may be used for application fees of less than \$1,000.

Please consult the schedule below for the appropriate fee for your request:

Urban Design Districts: \$350 (per §35.24(6) MGO).

Minor Alteration in the Downtown Core District (DC) or Urban Mixed-Use District (UMX) : \$150 (per §33.24(6)(b) MGO)

Comprehensive Design Review: \$500 (per §31.041(3)(d)(1)(a) MGO)

Minor Alteration to a Comprehensive Sign Plan: \$100 (per §31.041(3)(d)(1)(c) MGO)

All other sign requests to the Urban Design Commission, including, but not limited to: appeals from the decisions of the Zoning Administrator, requests for signage variances (i.e. modifications of signage height, area, and setback), and additional sign code approvals: \$300 (per §31.041(3)(d)(2) MGO)

A filing fee is not required for the following project applications if part of the combined application process involving both Urban Design Commission and Plan Commission:

- Project in the Downtown Core District (DC), Urban Mixed-Use District (UMX), or Mixed-Use Center District (MXC)
- Project in the Suburban Employment Center District (SEC), Campus Institutional District (CI), or Employment Campus District (EC)
- Planned Development (PD): General Development Plan (GDP) and/or Specific Implementation Plan (SIP)
- Planned Multi-Use Site or Residential Building Complex

Introduction

The City of Madison's Urban Design Commission (UDC) has been created to:

- Encourage and promote high quality in the design of new buildings, developments, remodeling, and additions so as to maintain and improve the established standards of property values within the City.
- Foster civic pride in the beauty and nobler assets of the City, and in all other ways possible assure a functionally efficient and visually attractive City in the future.

Types of Approvals

There are three types of requests considered by the UDC:

- Informational Presentation. Applicants may, at their discretion, request to make an Informational Presentation to the UDC prior to seeking any approvals to obtain early feedback and direction before undertaking detailed design. Applicants should provide details on the context of the site, design concept, site and building plans, and other relevant information to help the UDC understand the proposal and provide feedback. (Does not apply to CDR's or Signage Variance requests)
- Initial Approval. Applicants may, at their discretion, request initial approval of a proposal by presenting preliminary design information. As part of their review, the Commission will provide feedback on the design information that should be addressed at Final Approval stage.
- Final Approval. Applicants may request Final Approval of a proposal by presenting all final project details. Recommendations or concerns expressed by the UDC in the initial approval must be addressed at this time.

Presentations to the Commission

Primarily, the UDC is interested in the appearance and design quality of projects. Emphasis should be given to the site plan, landscape plan, lighting plan, building elevations, exterior building materials, color scheme, and graphics.

When presenting projects to the UDC, applicants must fill out a registration slip provided in the meeting room and present it to the Secretary. Presentations should generally be limited to 5 minutes or as extended by motion by consent of the Commission. The Commission will withhold questions until the end of the presentation.

Applicants are encouraged to consider the use of various graphic presentation material including a locator map, photographs, renderings/model, scale drawings of the proposal in context with adjacent buildings/uses/signs, etc., as may be deemed appropriate to describe the project and its surroundings. Graphics should be mounted on rigid boards so that they may be easily displayed. **Applicants/presenters are responsible for all presentation materials, AV equipment and easels.**

URBAN DESIGN DEVELOPMENT PLANS CHECKLIST

The items listed below are minimal application requirements for the type of approval indicated. Please note that the UDC and/or staff may require additional information in order to have a complete understanding of the project.

1. Informational Presentation

- Locator Map
- Letter of Intent (If the project is within an Urban Design District, a summary of how the development proposal addresses the district criteria is required)
- Contextual site information, including photographs and layout of adjacent buildings/structures
- Site Plan
- Two-dimensional (2D) images of proposed buildings or structures.

Providing additional information beyond these minimums may generate a greater level of feedback from the Commission.

Requirements for All Plan Sheets

1. Title block
2. Sheet number
3. North arrow
4. Scale, both written and graphic
5. Date
6. Fully dimensioned plans, scaled at 1"= 40' or larger

*** All plans must be legible, including the full-sized landscape and lighting plans (if required)*

2. Initial Approval

- Locator Map
- Letter of Intent (If the project is within a Urban Design District, a summary of how the development proposal addresses the district criteria is required)
- Contextual site information, including photographs and layout of adjacent buildings/structures
- Site Plan showing location of existing and proposed buildings, walks, drives, bike lanes, bike parking, and existing trees over 18" diameter
- Landscape Plan and Plant List (*must be legible*)
- Building Elevations in both black & white and color for all building sides (include material callouts)
- PD text and Letter of Intent (if applicable)

Providing additional information beyond these minimums may generate a greater level of feedback from the Commission.

3. Final Approval

All the requirements of the Initial Approval (see above), **plus:**

- Grading Plan
- Proposed Signage (if applicable) The address monument on West Wilson Street is a component of the project
- Lighting Plan, including fixture cut sheets and photometrics plan (*must be legible*)
- Utility/HVAC equipment location and screening details (with a rooftop plan if roof-mounted)
- PD text and Letter of Intent (if applicable)
- Samples of the exterior building materials (presented at the UDC meeting)

4. Comprehensive Design Review (CDR) and Variance Requests (*Signage applications only*)

- Locator Map
- Letter of Intent (a summary of how the proposed signage is consistent with the CDR or Signage Variance criteria is required)
- Contextual site information, including photographs of existing signage both on site and within proximity to the project site
- Site Plan showing the location of existing signage and proposed signage, dimensioned signage setbacks, sidewalks, driveways, and right-of-ways
- Proposed signage graphics (fully dimensioned, scaled drawings, including materials and colors, and night view)
- Perspective renderings (emphasis on pedestrian/automobile scale viewsheds)
- Illustration of the proposed signage that meets Ch. 31, MGO compared to what is being requested.
- Graphic of the proposed signage as it relates to what the Ch. 31, MGO would permit

City of Madison Urban Design Commission:

At the March 29th Urban Design Commission Meeting, the UDC referred consideration of The Moment Residences, LLC proposal to address five comments/conditions. In this letter I will provide clarity on three of the comments/conditions. The remaining two conditions (removing the “M” logo and specifying plant species) have been addressed and included in this updated submittal.

UDC Comments/Conditions:

Balconies:

The UDC prefers the balconies be treated with a finish that is compatible with the balconies on the upper two floors. Reading through the 3/29/23 meeting minutes, there were multiple comments from Commissioners stating that adding faux wood on the underside of all balconies below the top two floors is a “huge issue” and it would “add bulk and you get unintended consequences of a more chunky less refined balcony”. Additional comments stated that “you don’t want these balconies as big as the top two floors, you want to keep a thinner profile”.

The patio design solution follows UDC comments to retain the edge of patio trim on all sides. With the metal matching the building metal paneling. The underside of the patios on floors two through thirteen will also be stained using a similar warm tone to the metal cladding to complete at consistent, slim, and unified design.

Lake Monona Façade:

The commission had requested we consider redesigning the Lake Monona Façade by replicating the opaque wall design moves that are used on the longer side of the building elevations instead of the darker glass (previously shown) to break-up the façade.

Our submittal presents the UDC with 2 options to be selected and incorporated as the final design.

Preferred Option A: maintain an all-glass façade facing the lake while using a darker tone glass in the middle to break-up the façade. This will give our residents unobstructed views through floor-to-ceiling glass in all rooms of their lake facing apartments.

Option B: incorporate an opaque wall design on the Lake Monona Façade to replicate what is shown on the longer sides of the building elevations.

Lighting:

The Commissioners asked for more detail regarding the fixtures, light emission and mounting cabinets for the L-3 and L-4 building accent lights. Within this submittal we have included two spec sheets showing our proposed L-3 and L-4 mounting cabinets and an updated night rendering showing the proposed light emission from these fixtures. Both cabinets hide the light source by use of a lens and a J-channel.

Our intent, aligning with the UDC, is to provide a subtle, indirect glow on the building as accent lighting. We also intend for our building lighting to comply with all city ordinances and design standards and believe our proposed fixtures and cabinets will do so.

In closing, the UDC's feedback guided the alteration and redesign of The Moment while the project team also looked to maintain a timeless building design that adds the Madison skyline.

We are pleased to resubmit an updated design to the UDC. Thank you for your consideration of The Moment.

Sincerely,

The Moment Residences, LLC

4.5" Volta - Downlight Trim

Fixture Type

A

WAC LIGHTING

Responsible Lighting®

Fixture Type:

A

Catalog Number:

WAC #R4SD2T-S830-CB

Project: **THE MOMENT**

Location: **131 WILSON STREET
MADISON, WI**

PRODUCT DESCRIPTION

Volta LED downlight series represents an innovation in design and technology for architectural lighting. This high lumen and adaptable family of fixtures with a comprehensive set of round and square fittings, affords a sustainable solution for commercial, corporate, and upscale residential applications.

FEATURES

- 2" lens regress for superior glare control
- Field selectable light engine height for cut-off angle adjustment (30° - 34°) and accessory use
- Integral patterned tempered trim lens included standard
- Compatible with wide range of accessories
- 5 year WAC Lighting product warranty

SPECIFICATIONS

Construction: Durable die-cast self flanged aluminum construction

Input: Universal 120 - 277V AC 50/60 Hz

Dimming: Electronic Low Voltage (ELV): 100%-5%
0-10V: 100%-0%
Lutron Hi-Lume 1% Ecosystem Fade-to-Black option

Light Source: High output 3-step Mac Adam Ellipse COB
Rated life of 50,000 hours at L70

Mounting: Heavy gauge retention clips support trim firmly. Safety cabling standard.
Ceiling cut out (Round): Ø 5 1/8"
Ceiling cut out (Square): 5 1/8" x 5 1/8"
Accommodates 1/2" - 1 1/2" ceiling thickness

Finish: Electrostatically powder coated White, Black. Enamel coated Haze. Plated and brushed copper Bronze.

Standards: ETL & cETL Wet location Listed, Energy Star® 2.0, Title 24 JA8-2016 Compliant

The wireless, outdoor GLOBE sphere lamp is one of the great classics from the Smart and Green range. With its sleek, elegant design, this collection of luminous spheres is sure to entice you. Turn your garden or terrace into the must-be space of your home by adding touches of light which match your décor. Play with colors and also with size!

Because, for this product, Smart and Green proposes 5 different sizes of outdoor light spheres. Vary your visual pleasures and concoct your outdoors as you wish by choosing from PEARL, the smallest model, through to GLOBE XL, the largest one. A host of possibilities to discover! And, with our Bluetooth MESH technology, you can control all your wireless outdoor ball lamps. Choose colors and brightness, create light groups and schedule wake-up alarms! Our SmartMesh app is available for iOS and Android.

Just imagine controlling all your garden lights with a few clicks without moving from your sofa! It's all possible thanks to your smart ball lamps. To start using our products, why not check out our online user guide which will help you pair your lights to the app.

HALF SPHERE LAMP DEMI

50, 65 AND 80

215,00 €

dont 0,25€ d'éco-participation

DEMI, our semi-sphere lamp, will brighten up your ground spaces perfectly, wherever you choose to set it. Its sleek design brings a touch of elegance and light to your gardens and terraces. Your now-enhanced outdoor spaces will be in a class of their own and will stir your guests' curiosity. Any time you get the urge, a few clicks is all it takes to change the color of your semi-sphere LED lamp, trigger another ambiance and create unique moments! Let it blend into your greenery and add a dash of style to your garden so you can delight in your DEMI day-in, night-out.

Whether you've got a tiny piece of land or an immense garden, Smart and Green tailors to your needs and proposes different versions of this product. Discover this semi-sphere LED lamp in its three different sizes: **DEMI**, **DEMI L** and **DEMI XL**! Go for a small size if you wish to add a dash of brightness or choose bigger ones to boast your outdoor scenescape with light. Then again, if you've fallen in love with DEMI, why not select different sizes and create a harmonious composition using this decorative object in your garden.

All these lights integrate **Bluetooth MESH technology**. This wireless technology offers you countless options for conjuring up the atmosphere that suits you perfectly in just a few seconds. No need to move around to switch on your lamps as everything is done via your smartphone!

LANDSCAPE LIGHTING

Fixture Type:

B

Catalog Number:

WAC #5012-30-BZ

Project:

THE MOMENT

Location:

131 WILSON STREET
MADISON, WI

PRODUCT DESCRIPTION

Landscape accent luminaire. Simple to retrofit existing line voltage systems or coordinate well with a new commercial landscape installation.

FEATURES

- Adjustable and lockable beam angle
- Integral dimmer
- IP66 rated, Protected against high-pressure water jets
- Includes a detachable shroud
- Solid diecast brass or corrosion resistant aluminum
- Factory sealed water tight fixtures
- Detachable shroud, 6' lead wire and wire nuts included
- Maintains constant lumen output against voltage drop
- UL 1598 Listed
- Not suitable to use with external dimmers

SPECIFICATIONS

Input: 110V - 120VAC
Power: 3.5W to 14.5W
Brightness: 100 lm to 900 lm
Beam Angle: 15° to 60°
CRI: 85
Rated Life: 45,000 hours

TKO optic kit includes a 5°, 10° and 15° tilt filters and a 5° axial spread filter. TKO kits are standard on PDX4 LED fixtures and include a mounting ring.

Notes:

- 120 Volt power supply is magnetic and dimmable using standard incandescent dimming controls when ordered with IDIM option.
- MVOLT = 120-277 electronic power supply, non-dimmable.
- Meets ADA requirements for coefficient of friction.
- Only for use in 50HZ applications.

PROJECTED LED LUMEN MAINTENANCE

Data references the extrapolated performance projections for the Fixture platform in a 25°C ambient, based on 8400 hours of LED testing (tested per IESNA LM-80-08 and projected per IESNA TM-21-11).

To calculate LLF, use the lumen maintenance factor that corresponds to the desired number of operating hours below. For other lumen maintenance values, contact factory.

| Operating Hours | 0 | 25,000 | 50,000 | 100,000 |
|--------------------------|------|--------|--------|---------|
| Lumen Maintenance Factor | 1.00 | 0.98 | 0.97 | 0.95 |

LUMEN AMBIENT TEMPERATURE (LAT) MULTIPLIERS

Use these factors to determine relative lumen output for average ambient temperatures from 0-40°C (32-104°F).

| Ambient | Lumen Multiplier | |
|---------|------------------|------|
| 0°C | 32°F | 1.02 |
| 10°C | 50°F | 1.01 |
| 20°C | 68°F | 1.00 |
| 25°C | 77°F | 1.00 |
| 30°C | 86°F | 0.99 |
| 40°C | 104°F | 0.98 |

SLIP RESISTANCE AND LOAD RATING

| PDX4 |
|--|
| MAXIMUM LOAD RATING Peak compression force of 2,048 lbs. |
| LENS STATIC COEFFICIENT OF FRICTION PDX4 Anti-Slip Lens (FLCAS): Dry = 0.78; Wet = 0.30 PDX4 Slip Resistant Lens (FLSR): Dry = 0.68; Wet = 0.59 |

G

PERFORMANCE DATA

LUMEN OUTPUT

Lumen values are from photometric tests performed in accordance with IESNA LM-79-08. Data is considered to be representative of the configurations shown, within the tolerances allowed by Lighting Facts. Actual performance may differ as a result of end-user environment and application. Contact factory for performance data on any configurations not shown here.

OPERATING TEMPERATURE: -30°C Through 40°C

SPECIFICATIONS AND FEATURES

CONSTRUCTION: Door material - die cast bronze or stainless steel. Housing - die cast bronze and injection molded thermoplastic. The housing is U.V. stabilized, impact and corrosion resistant for use in all types of environments. Conduit entries - two 1/2" NPT side entries standard, two 1/2" bottom entries are optional.

SOURCE: LED: Monochromatic LED, 9W. All withing 3MacAdam ellipses

VOLTAGE: MVOLT (120-277) or 120 for dimming

LEVEL DISTRIBUTION: SP (Spot) or MFL (Medium Flood)

LENS/SEAL: Tempered clear flat borosilicate glass. The patent pending door / lens seal uses proprietary knife edge technology to secure the assembly to the housing. Two captive screws hold the assembly in place. The lens is notched to provide maximum aperture opening.

FIXTURE AIMING: The Paradox™ Series uses optical aiming filters. The TKO kit consists of 4 filters: 5°, 10° and 15° tilt and 5° axial spread.

ELECTRICAL: Integrally mounted modular LED transformer, prewired for easy installation and maintenance. Junction box suitable for thru-branch wiring.

FINISH: Natural bronze or stainless steel with a brushed finish.

BUY AMERICAN: This product is assembled in the USA and meets the Buy America(n) government procurement requirements under FARS, DFARS and DOT. Please refer to www.acuitybrands.com/resources/buy-american for additional information.

LISTING: cCSAus, suitable for wet locations, laboratory tests conducted by CSA to UL Standard UL-1598 and UL-8750.

RATED: IC, non-IC, ground mounted recessed.

WARRANTY: 5-year limited warranty. Complete warranty terms located at: www.acuitybrands.com/support/warranty/terms-and-conditions

NOTE: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

LEDme® Step Light

WAC LIGHTING

Responsible Lighting®

G2

Fixture Type:

G2

Catalog Number:

WAC #WL-LED100-C-WT

Project:

THE MOMENT

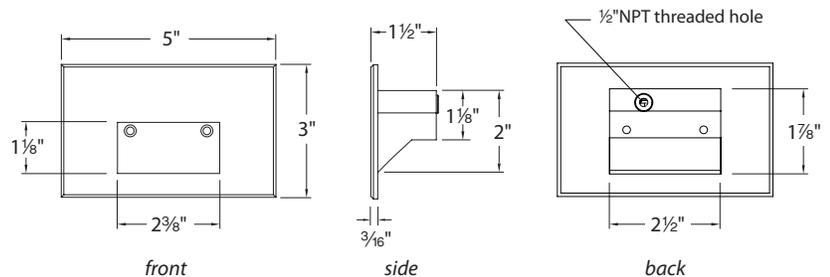

Location:

MADISON, WI

PRODUCT DESCRIPTION

Horizontal rectangle LEDme® Step Light. Designed for safety and style on stairways, patios, decks, balcony areas, walkways and building perimeters.

Features an architectural design. Energy efficient for long-lasting indoor and outdoor lighting solutions. Creates an attractive, romantic impression at night.

FEATURES

- Solid diecast brass, corrosion resistant aluminum alloy, or cast stainless steel construction
- Direct wiring, no driver needed
- Low profile, flush to wall aesthetics with no visible hardware
- 54,000 hour rated life
- Balanced lighting, free of shadows with minimum glare
- IP66 rated, Protected against high-pressure water jets
- Up to 200 fixtures can be connected in parallel
- 5 year WAC Lighting product warranty

SPECIFICATIONS

Construction: Die-cast aluminum or 316 marine grade cast stainless steel

Power: Direct wiring, no remote driver needed. Input voltage: 120V or 277VAC 50/60Hz

Light Source: 2700K or 3000K CCT Samsung HV-AC High Power LED, CRI: 90
Optional color lenses. Total power consumption of 3.5W

Mounting: Fits into 2" x 4" J-Box with minimum inside dimensions of 3"L x 2"W x 2"H
Includes bracket for J-Box mount.

Dimming: Dim to 10% with electronic low voltage (ELV) dimmer
Approved dimmers: Lutron Nova-T NTELV-300 & NTELV-600, Lutron Vietri VTELV-600, Lutron Diva DVELV-300P, Lutron Skylark SELV-300P, Lutron Maestro MAELV-600

Standards: IP66, UL & cUL Listed for wet locations, Title 24 JA8-2016 Compliant.

Introduction

The WEDGE2 LED family is designed to meet specifier's every wall-mounted lighting need in a widely accepted shape that blends with any architecture. The clean rectilinear design comes in four sizes with lumen packages ranging from 1,200 to 25,000 lumens, providing a true site-wide solution. Embedded with nLight® AIR wireless controls, the WEDGE family provides additional energy savings and code compliance.

WEDGE2 delivers up to 6,000 lumens with a soft, non-pixelated light source, creating a visually comfortable environment. When combined with multiple integrated emergency battery backup options, including an 18W cold temperature option, the WEDGE2 becomes the ideal wall-mounted lighting solution for pedestrian scale applications in any environment.

Landlord Soft

Adjustable head for ground poles installation designed by Piero Lissoni

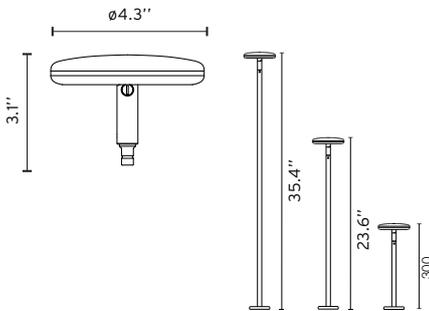

Description

Discreet and orientable, Landlord Soft is an adjustable head to be installed on ground poles for external use, designed to offer diffuse lighting. It is the perfect tool to light bushes, flowerbed and transit areas with a homogeneous diffuse light beam. It is characterized by an aluminum disk shape head, orientable up to 20 degrees and lockable in position.

Landlord is the lord of the earth and the lord of light, and if you are a flower or a tree or a simple two or four-legged animal, you have to ask Landlord for permission if you want to pass unharmed through the night. - Piero Lissoni

| Output Driver Voltage | 24V |

Performance

| | |
|--------------------------|-----------|
| Maximum delivered output | 269 |
| Efficacy | 53.8 lm/W |

Notes

Recommended connections for in-ground installations with a 2-way terminal block 4-pole IP68 water stop on 24V side. Order separately.

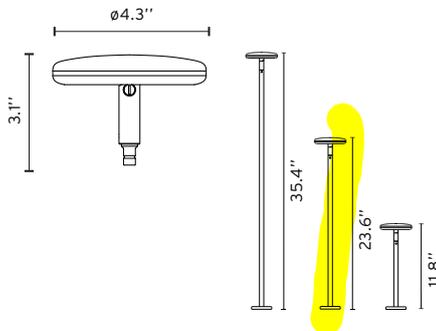

All drivers should be installed in weather resistant enclosures (by others) or indoors. Silicon filled wire-nuts where required, should be used on all line-voltage connections to avoid syphoning moisture to electrical components.

The painted versions are an exterior rated epoxy polyester powder coat finish for superior strength, heat and UV resistance.

During installation and maintenance avoid scratching or damaging the finish as it may result in premature corrosion of metal surfaces. Avoid cleaning fixtures with corrosive chemicals as it may result in voiding the warranty.

LED fixtures are highly susceptible to failure due to electrical effects from poor connections, and electrical short circuits. These are frequently caused by (a) over-voltage from primary voltage sources, (b) electrostatic discharge from the exterior environment. Ensure that all outdoor fixtures are installed on GFI circuits as required by code, and use proper surge protecting devices to avoid irreversible damages to electrical components.

Fixture Type

Description

K2

- Decorative outdoor solar light can be swaying with the wind, like a group of fireflies flying in the dark, dancing beautifully, creating a romantic atmosphere.
- Solar garden lights can be automatically charged during the day and automatically turn on at night. It can be fully charged in 4-6 hours under direct sunlight, and can be lighted for 8-15 hours under full power.
- Outdoor waterproof lawn lights can be used normally even in rainy weather. It is perfect for outdoor decoration, as well as for road lights and landscape lighting.

DETAILS

| Product nr. | KLUS #18038K7_2 |
| Fixture type | L |
| Company | KLEIN LTG |
| Job name | THE MOMENT |
| Date | 3/14/23 |

TECHNICAL SPECIFICATION

Application

- protects the edge of the step and has two types of lighting modes: warning and lighting the steps

Mounting

- with bolts appropriately selected for the type of the mounting surface

Additional information

- the extrusion is sold with two Anti-slip rubber strips
- part flush to the vertical plane of the step fits in the angle of 30 degrees
- the bottom LED strip directs the light forward and is secured with the LIGER-22 cover
- narrow LED strips (up to 0.24" / 6 mm) that emit light from the side in the channel under the silicone strip
- standard LED strip width (up to 0.39" / 10 mm) to illuminate the step

Possibility of making a linear fixture with IP67 protection, which means the fixture is dustproof and waterproof.

Fixture Type

- UL Listed
- CRI 90+
- 2-Step MacAdam's ellipse, single binning
- L70- Over 50,000 hours
- R9 up to 81
- Reverse voltage protection
- Minimum 2oz copper PCB

WIRE OPTIONS

36"-72" wire leads (20 gauge jacketed wire)

Turn off LED lights during peak day light hours in outdoor applications to avoid excessive heat buildup which will result in diminished LED life.

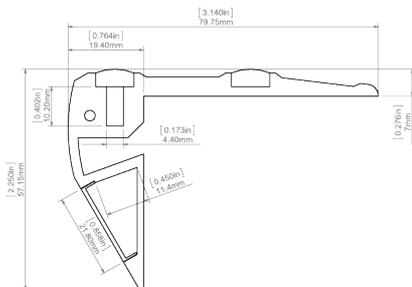

ADA Compliant*

*Pending installation, product designed to conform to the needs of a person with disability.

- in the groove with mounting adhesive or springs

Additional information

- the light reflection chamber may be open or covered with a frosted lens
- space for LED strip: 0.52" / 13.2 mm

Turn off LED lights during peak day light hours in outdoor applications to avoid excessive heat buildup which will result in diminished LED life.

Fixture Type

DEEP GRAZER EXTRUSION + LED TAPELIGHT

L3

SPECIFICATIONS

| | |
|---------------|---|
| FINISH | Silver Anodized, Black Powder Coat, White Powder Coat |
| LENS | 15° Grazing |
| WATTAGE | 1.5W/ft to 7.6W/ft |
| IP RATING | IP20, IP65 - rating applies to tapelight, see page 2 for details |
| CCT / COLOR | 2200K - 5200K; RGB; RGBW; tunable white; warm fade |
| BEAM SPREAD | 15° typical with Grazing lens |
| INPUT VOLTAGE | 24VDC |
| LENGTH | Made to order. Actual lengths vary by LED tapelight cut points. Maximum assembled length is 94in. Lengths over 94in are made with multiple sections, shipped unassembled. |
| OUTPUT | 117 to 651 lm/ft |
| LEDS | Single binned LEDs +/- 30-70 CCT, MacAdam 3 SDCM |
| MATERIAL | Extrusion - Anodized aluminum; Lens - Polycarbonate |
| MOUNTING | Mounting clips recommended |
| POWER SUPPLY | Requires a 24V power supply - see page 5 |
| WARRANTY | IP20 - 5 year limited, IP65 - 3 year limited |

5 YEAR LIMITED WARRANTY

FEATURES & RECOMMENDED APPLICATIONS

Surface-mount extrusion with a deep profile and 15° Clear Grazing lens. Highlight textured walls and irregular surfaces, bringing features to life. Ideal for textured plaster, brick surfaces, stone facades, wave walls, and corrugated surfaces.

PRODUCT: LLI-DEP-SG-H4.4W-30K-24V-94IN

DEEP GRAZER EXTRUSION + LED TAPELIGHT

ORDERING GUIDE (CONTINUED)

5. LENGTH

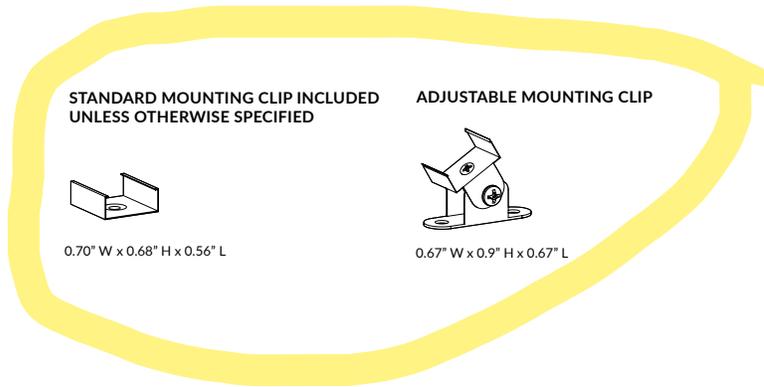

5. LENGTH

Enter overall extrusion length in inches. Maximum assembled length is 94in. Lengths over 94in are made with multiple sections, shipped unassembled. Overall Extrusion+LED tapelight length will be rounded down based on nearest LED tapelight cut point.

6. MOUNTING (OPTIONAL)

6. MOUNTING

 Default [blank] - Standard Clip
ADJ Adjustable Clip

7-9. POWER FEED (OPTIONAL)

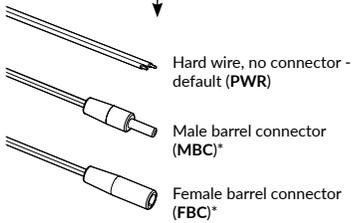

| 7. LEAD TYPE | 8. LEAD LENGTH | 9. FEED TYPE |
|--------------------------------------|--------------------------------------|--------------------------------------|
| <input type="text" value="[blank]"/> | <input type="text" value="[blank]"/> | <input type="text" value="[blank]"/> |

Default [blank] - 48" hard wire end feed (PWR48EF)

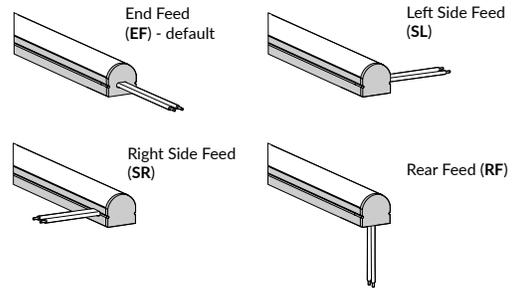

- PWR** Hard wire
- MBC*** Male barrel
- FBC*** Female barrel

Enter desired wire length in inches.

- EF** End Feed
- SL** Left Side Feed
- SR** Right Side Feed
- RF** Rear Feed

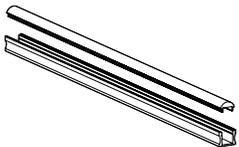

STANDARD 48" HARD WIRE END FEED INCLUDED UNLESS OTHERWISE SPECIFIED

*Barrel connectors not compatible with RGB, RGB(W), or Tunable White tapelights.

* 1.5W and 2.2W IP65 tapelight maximum run is reduced to 50 ft, only IP20 may reach maximum run of 60 ft.
 ★ Recommended options.
 ♦ Warm Fade tapelight requires a UDEFF or 0-10V dimmable power supply.
 ** Diode visibility data tested at 100% output. Diodes may become more visible as tapelight dims.
 ^ Lumen data based on frosted lens, IP20 tapelight, 30K white output, or combined output for tunable white, warm fade, RGB, and RGB(W) tapelights.
 * Protection varies according to IP Rating. See below or refer to lialighting.com/resources for more information.

- IP20, uncoated - Dry Location
- IP65, silicone covered - Wet Location - Limited protection from water ingress. Not suitable for applications that may see pooling or standing water conditions. Not suitable for submersion.

PRODUCT DESCRIPTION

L4

- Service is carried out from below, enabling the construction of wall-to-wall lighting fixtures
- An LED lighting fixture with a low glare rating UGR below 19 (with the JUN-100 prismatic cover) can be built
- The fixture can accommodate control electronics
- A system solution for comfortable assembly and disassembly
- Directs light downwards and upwards
- Ability to build lighting fixtures with high light output
- Resistance to vibrations - safety
- Can be combined into strings and segmented lines
- Light output can be increased with REFLEX 16-60 reflectors
- LED tapes or LED current modules can be used

FINISH :

Silver anodized

TECHNICAL SPECIFICATION

Application

- for the construction of advanced ceiling fixtures, mounted to the surface or in difficult installation locations

Mounting

- comfortable and reliable assembly,
- the possibility of using self-tapping screws.

Additional information

- the MOD-100 lighting fixture can be anodized or painted,
- MOD-100 lighting fixtures can produce a strong downward light beam (6 LED tapes, 10 mm wide) or 2 LED current modules 24 mm wide), and an upward beam (1 LED tape, 10 mm wide),
- MOD-100 is designed as a "core" (profile with LED tapes), which can be prepared in advance (in factory conditions),
- at the installation site, it is enough to insert the prepared "core" into the body of the fixture and connect power,
- use 2 locking bolts for each 1m of the fixture. With fixtures shorter than 1m, use at least 2 bolts.

The following covers should be used with the MOD-100 fixture:

- **JUN-100 prismatic** material: PMMA, length: 59"/1.5 m, UV resistant, glare rating UGR ≤ 19 possible,

MEDIUM LUMINOSITY 3.5W LED TAPELIGHT - IP68

TECHNICAL INFORMATION

NOTE: All data has +/- 5% tolerance.

| | |
|------------------|---|
| WATTAGE | 3.5W per foot |
| IP RATING | IP68 - wet locations. Protected against temporary submersion, limited protection against harsh environments. |
| OUTPUT | 22K - 225 lm/ft 27K - 235 lm/ft 30K - 243 lm/ft 35K - 249 lm/ft 42K - 262 lm/ft 52K - 271 lm/ft |
| INPUT VOLTAGE | 24VDC |
| OPERATING TEMP. | -13° to 140° F |
| CRI | 90+ |
| CUT LENGTH | Every 2.5", or every 6 LEDs |
| MAXIMUM RUN | 40 feet |
| DIMENSIONS | 0.67" W x 0.35" H (17mm x 9mm) |
| ADHESIVE BACKING | Yes - VHB |
| LIFESPAN | 50,000 hrs |
| WARRANTY | 3 year limited |
| POWER SUPPLY | Compatible with all 24VDC power supplies - see page 4 |

CONNECTOR OPTIONS (SOLD SEPARATELY)

Not compatible with connectors - must be fabricated to specification by factory. Use Layout Guide on page 3 to specify factory-assembled connections.
