Here's what this first set of plans can help you build - a Little Library in the style of the Amish Cabin. Michael Kramer has put together some drawings and instructions for the basic structure. You can vary these any way you wish.

A five foot 4" x 4" post put 24" in the ground will do the trick. No need to use cement. Just pack it tightly and make sure it's steady.

Could this be Bookus Binder, Little Library patron and reader? Yes...and she is eager to see what you can build. Go for it! We hope these plans make it easier for you.

A little landscaping, some flowers on a bench can make your Little Free Library more inviting.
