Subject: Re: Planning Commission Meeting

Thank you, Mark. We have a visiting granddaughter here, and I would prefer not to have to attend the meeting. We have two concerns after looking at the proposed plan for the new structure.

1. When our driveway was installed 4 years ago, the city inspector who consulted with the concrete contractor set the level of the driveway so that the sidewalk that runs along the east side of Lake Mendota drive, opposite Spring Harbor Middle School, could be extended from its present location at our driveway. It did not appear that a sidewalk was included in the plan that was submitted.
2. We feel the proposed 3-story tower is out of keeping with the height and appearance of the rest of the homes on the harbor, which are limited to two stories. We urge the commission to conform to the standard that the homes on the harbor shall not exceed two stories.
