Subject: RE: Follow-up Question for the Bridging the Digital Divide RFI

Hi Rich,

I wanted to follow up with you in regards to the messages I left. We can definitely pool the data between the devices. In the RFI, the rate plans in section 4.3 can either be stand alone or pooled between users. As for buying outright, are you looking to purchase service for a certain period of time and data amount? If that is the case, we can definitely set something up to accommodate that. Typically with requests like these, we would just bill you and accept payment upfront. Does this answer your question? Please let me know. Thanks again everyone for considering T-Mobile and I look forward to hearing from you.

Sincerely,

Maggie

Subject: Follow-up Question for the Bridging the Digital Divide RFI

Good Morning Maggie,

The Digital Technology Committee and the City of Madison would like to thank T-Mobile for their submittal to the Bridging the Digital Divide RFI. The Digital Technology Committee has a follow-up question about your submittal and they would greatly appreciate clarification on the following item:

Is there an option to bundle 10 gigs or other amount of data and the device in one price so the City can buy it outright?

The next Digital Technology meeting will be held on Thursday December 11th and the Committee would like to have your responses to this question before that date if possible. You can send you response directly to me and please also copy lstarczewski@cityofmadison.com. Please contact me if you need clarification on any of this item. Thanks again for your participation in the RFI.
