Subject: East Johnson Street Path Connection

Dear Madison Plan Commission members,

As a resident of the Emerson East neighborhood whose main means of transportation is biking I fully support the proposed new connection of the Demetral Park Path to East Johnson Street as published on 11/29.

Relocating/building the path as proposed will make taking this route more intuitive and will reduce possible conflicts between bikes and cars, as well as pedestrians and other bikes. Overall, this project will add to making biking and walking more attractive to residents and visitors of my neighborhood and nearby neighborhoods. I'm very supportive of the fact that the City of Madison is using resources to improve the connection of the northeast to the downtown path system. The more continuous a path system is the the easier and safer it is to use!

Sincerely, Indira Ceylan

Upham St, Madison, WI 53704
