RE: Demolition Recycling and Reuse Plan for 5380 Shaw Court

Dear Mr. Bryan Johnson:

The one story two bedroom house at 5380 Shaw Court is proposed to be demolished. Below is an outline of the items that will be followed for the demolition and recycling and reuse of the building materials.

Habitat for Humanity ReStore was contacted on 6/15/18. I talked to Sean Bakken and reviewed his list of possible items for reuse, and he indicated that there was nothing in the house that they were interested in salvaging.

Asbestos: The house is in the process of having an asbestos survey completed. A qualified remediation contractor will remove all hazardous asbestos. The architect has seen asbestos floor tile in the house. This work will be done prior to any other demolition work.

Mercury: There is a mercury thermostat in the house, it will be removed and taken to The Dane County Clean Sweep drop off site. There are no fluorescent bulbs in the house.

Appliances: The building owner plans on taking and reusing in another building the building water heater and refrigerator. The building does not have air conditioning, and there are no appliances with CFC to recycle. The demolition contractor will take all other appliances to a scrap metal yard.

Metal: Aluminum siding, screen doors, gutters, & downspouts; metal chimney, metal ductwork, metal piping and exposed conduit will be collected and taken to a scrap metal yard.

Building Materials: The remainder of the house, wood, asphalt shingles, plastics, & concealed metal will be demolished and placed in dumpsters and sent to Royal Container for sorting and recycling as building waste.

Concrete: The concrete footing, concrete block foundation walls, and concrete sidewalk will be taken to the demolition contractor's quarry for crushing and recycling into road base.

It is understood that a Compliance Report will need to be submitted to you 60 days after completion of the demolition. That report shall include materials that were reused, and the volume of material that was recycled and landfilled. Also included shall be information on where recycled materials were sent. To comply, the demolition contractor shall provide copies or receipts and/or weight tickets. It is understood that there are fines for not complying with this report.

Respectfully Submitted,
