**City Engineering and MSR Design are nearing completion of the MMB/CCB pre-design effort. As part of the fourth major design work session the team would like to present the draft pre-design report work to the Common Council for consideration and critique. This draft represents the coalescing of ideas from designers, city leadership, internal and external stakeholder groups, and the general public. The team considers this a very important meeting to review the draft pre-design report to date and provide direction for future cost estimating and design phases.**
