A&J Vans has been in business for 34 years as a secondary manufacturer of RV conversions and A&J Mobility has been performing modifications of vehicles for persons with disabilities for 22 years. It is the mobility aspect of our business that we are required to relocate due to the upcoming expansion of Menards.

A&J Mobility sells and installs adaptive equipment for vehicles to assist persons with disabilities in staying mobile. Our mobility business is a specialized service to help persons with unique needs. We strive to make our clients life as productive and enjoyable as we can with our wide variety of options.

Samples of equipment that would be sold and installed at this location would be:

- Hand Controls
- Left foot Gas Pedals
- Wheelchair Lifts- both side and rear
- Scooter Lifts
- Special Seating Options

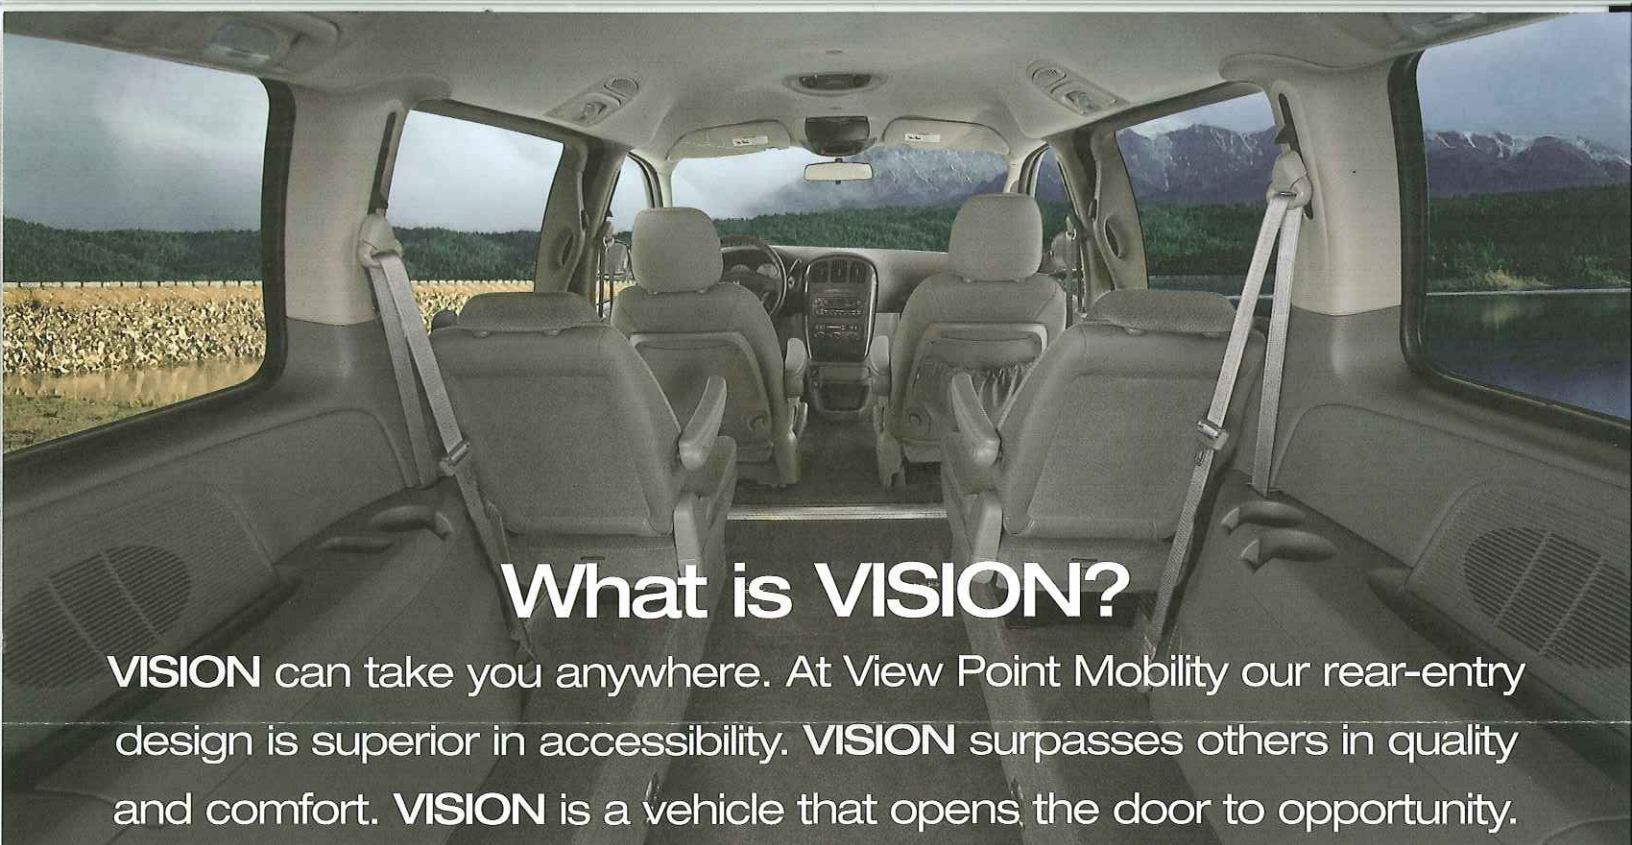

The servicing and repair of this equipment will also be done at this facility. There would be no repairs to the vehicles itself, only the adaptive equipment.

Likewise, we will be selling new and used mobility vehicles to private individuals which will require us to have a motor vehicle dealer license. We have included the application for your approval with this letter. We will have an inside showroom for the ease and convenience of our clients to view and demo our mobility equipment. At any given time we may have a maximum of 10 mobility vehicles at this location with half inside and half outside.

If you have any further questions about A&J Mobility please feel free to call me at 920-775-9333 ext. 303.

What is VISION?

VISION can take you anywhere. At View Point Mobility our rear-entry design is superior in accessibility. **VISION** surpasses others in quality and comfort. **VISION** is a vehicle that opens the door to opportunity.

VISION by View Point Mobility

- Unique rear-entry design eliminates parking hassles
- Take family along, seats up to 7 passengers or 2 wheelchairs
- Advanced hydraulic system lowers ramp to make entry easy
- Independent-driver option places you in control behind the wheel
- Designed and tested for safety

View Point Mobility makes specially engineered modifications to Chrysler, Ford, and GM minivans without detracting from the safety features. Wheelchair users have no trouble getting in or seeing out. The rear-entry design allows the vehicle to fit nicely in tight places like a single-car garage. **VISION** can go anywhere.

VISION behind the scene

The owners of View Point Mobility have been working to improve transportation for the physically limited for more than a decade. Together we are dedicated to serving the physically challenged. **VISION** led our designers to create the rear-entry vehicles, using a state-of-the-art hydraulic system. We use the latest computer technology to craft each part before it is manufactured. Our vehicles are tested for safety and convenience. To guarantee outstanding customer service, View Point Mobility's staff has strong relationships with mobility dealers. See the **VISION** for yourself.

VISION by design

Fully manual or automatic, you decide. The automatic design uses innovative hydraulics system engineered for **VISION** is similar to technology used in many of today's heavy transportation vehicles such as airplanes and construction equipment. The hydraulic system lowers the van and ramp to a comfortable angle, that makes entry easy for wheelchair and scooter users. The rear door opens - the van lowers to the ground and the ramp unfolds in a matter of seconds. The ramp can be operated manually or automatically with a remote.

Optional Transfer Seat.

Beyond All Limits

North America's Premier Wheelchair Access Minivan

Your Lifestyle...Your Rampvan

Available on Chrysler Town & Country
and Dodge Grand Caravan chassis

Automatic Door
The original Chrysler door operator reliably opens the sliding door at the touch of a button.

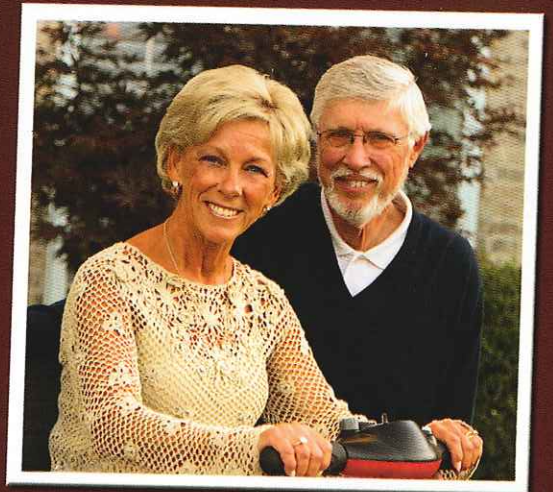

Kneeling Suspension
As the door opens, the rear suspension "kneels" to reduce the slope of the ramp even further.

Automatic Ramp
The Infloor or Foldout aluminum ramp extends to allow easy access to the lowered floor interior.

Remote Control
The Rampvan's accessible functions are controlled by the Chrysler remote and several interior switches placed for your convenience.

www.braunmobility.com

When Ralph Braun built his first power wheelchair in 1962, little did he realize the solution to his personal mobility would change the lives of thousands of individuals. It was the start of a new company, and the beginning of an industry that would slowly change the public's perception of people with disabilities. Today, over 40 years later, Ralph remains the driving force behind the company and the industry he created. The tradition of excellence in customer service and quality products continues with the Braun Rampvan, the flagship of the Braun line. Having personally used his mobility aids from the very beginning, Ralph Braun invites you to place your confidence in the products bearing his family name.
