

BPW Meeting November 5, 2014

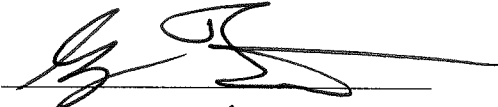

Review of Projects by Engineering Environmental Staff for Impacts to Water Resources

**21. Design of a feasibility level storm water treatment project**

**If constructed this** project will disturb over an acre of land, which will require a Notice of Intent permit from the DNR, and a City Engineering Erosion Control/Stormwater Management permit. Additionally, a Chapter 30 permit from the WDNR along with an NR-103 wetland review and likely other permits will be need in advance of any construction - no permitting is needed currently but staff are aware of future permit possibilities and have already met with WDNR staff. (Lauren Striegl, City Engineering)
