

We would like to amend our window plan for the basement remodel. Originally we wanted to save and rehab the old windows. This is difficult and expensive. The windows never had storms and were not built for use with heated interior spaces. We would like to save the old windows to use in a future planned garage. The use of the old windows will connect the new garage structure to the original house.

The old windows are to be replaced with Marvin aluminum clad windows and doors in the color 'Evergreen'. The exterior of the windows will have a lead tape grid to match the leading on the original windows.

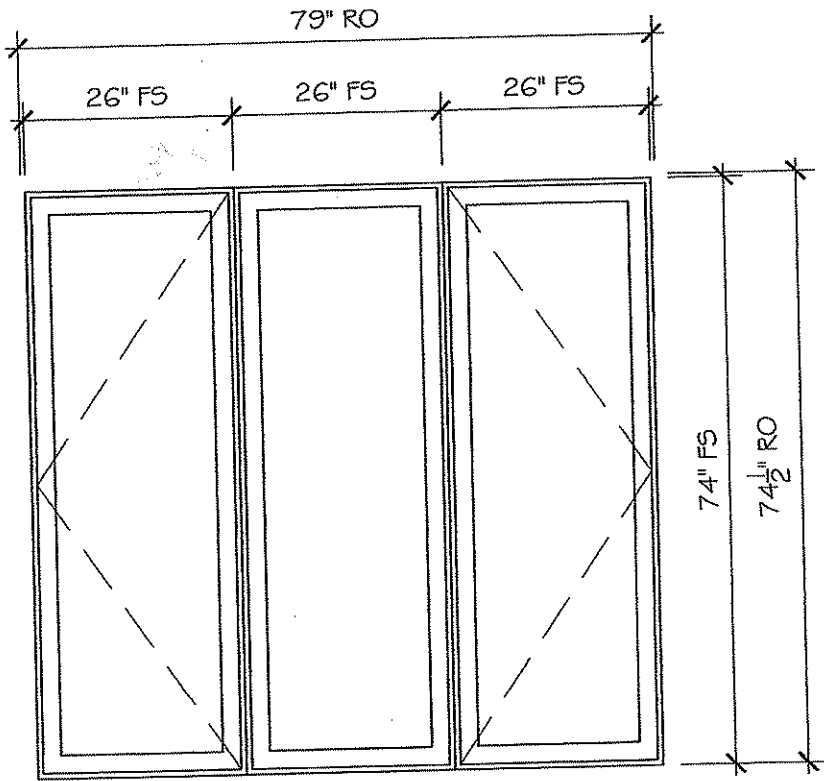

With Thanks,

Christina Ruhaak
