Hi, Jule,

Emerson East and Eken Park have expressed interest in updating our current joint neighborhood plan. One of things that Emerson East faces is a string of empty storefronts and marginal businesses along East Washington Ave. We also have to take into account the possible development of Union Corners across the street, and maybe a redevelopment effort at the former Fiore Shopping Center. We might also see a changing pattern of use at Demetral Park when the new dog park is installed, and this might require some adjustments at Demetral and the intersections leading to it. There are other things I can't think of right now, but we are definitely interested.

Thank you.

John

----- John,

I am putting together a "listing" of potential areas within Madison that meet the CDBG (Community Development Block Grant) polices to receive planning services. Census Tract 21 (Emerson East-Eken Park area) is an eligible area. I am trying to assemble information on if the neighborhood area would be interested in planning services, and if so, what issues are the neighborhood dealing with that would benefit from a planning process. Any thoughts?

Hope all is well, Jule
