Hello,

My family currently lives very near this location and I just wanted to comment that the owner of this property has done a very poor job of lead dust containment when doing renovations. Within the past couple of years they were scraping paint on the outside of the house without drop cloths to catch paint chips and were sanding old windows outside without any containment. I would like to request that they be reminded that they must use proper lead abatement methods during this demolition project for the health and safety of their neighbors.

Thank you,  
Ryan Clark

Hello,

I live in a house adjacent to 748 Jennifer St.

That house has a recent history of poor lead paint containment practices. As a very close neighbor with a small child, I am concerned that proper lead containment and abatement practices may not necessarily be followed if/when their garage is demolished.

Thank you,  
Sarah Whitcomb  
412 S Livingston St.
