

1. Why is over 2 months required for watermain replacement?

2. What reduction in schedule time is gained by allowing night work? One month should be adequate, with possible extensions for weather issues.

3. What is the proposed service time for 2 16-in water mains prior to upgrade?

4. Will both mains be located in same traffic lane? This could possible reduce future repair/replacement costs.

5. Have other utility replacement issues such as sanitary been investigated?

6. Where is the tie-in to the adjacent well? Does this need to be replaced, upsized? Move water supply to north traffic lane? Will valves be installed to isolate areas for future repair or switch to other wells to prevent water shutoff during well upgrades?

7. Currently, there are issues at Odana/Whitney intersection with running red lights, turning on right when not allowed. How will increased issues be addressed/monitored? Police presence?

8. Address foot and bike traffic safety.

9. What is being proposed to mitigate noise issues? Enforce jakebraking ordinance?

10. Already neighborhood access issues at Midvale/Verona Rd. Please address. Possibly reschedule to next year.
