

TO Whom it May Concern: 3/23/09

Our family lives at 5217 Camden Road. We have 9½ yrs old son who has been diagnosed with autism at the age of three. Autism spectrum disorder affects our son's cognitive judgment, and social functioning.

We have a concern about the proposed curbs, gutter and sidewalks with speed bumps. In our situation with having a son with a developmental disability sidewalks would not be beneficial. Our son cannot ever be left alone to walk without someone to guide him. He does not have any physical disabilities, but lacks the mental capacity to make wise decisions.

Please reconsider your decision on destroying our neighborhood for our children.

Mrs & Mrs David
