

Dane County Economy Fact Sheet

With just over 488,073 residents, Dane County has the fastest growing population of any county in Wisconsin, growing at a rate of over 9% in the last decade 2000-2010. During that time we added 61,547, or over 6 thousand residents per year. Many key industry sectors drive our diverse economy including health care, manufacturing, renewable energy and technology and agriculture. As well, UW Madison continues to be among the top recipients of federal research funding, and is the center of world class high-tech and bio-tech research and facilities.

Our workforce is the result of an outstanding education system; a diverse economy; important partnerships between the private sector and public sectors; and our technical colleges and higher education institutions that are dedicated to ongoing training, retaining and promoting a workforce for the future.
