Hi all,

I'm a visual learner, so to help visualize Alder Vidaver's comments that this Historical District does have smaller lot sizes, I was able to pull this picture of lot sizes. The lot that we're talking about is highlighted in LIGHT GRAY in the middle of the screenshot, all the BLUE lots highlighted are 4,500 square feet or smaller.

This screenshot is taken in only a portion of the historical district. I encourage you to mess around with the filters available in the OpenData map available [here](#), which is how I was able to get this screenshot.

Thanks,

MGR Govindarajan (*he/him/his*)

Here's a picture of lots that are or less than 4000 square feet within the same Historical District.
