davidsherrard@alliantenergy.com

I am very interested in representing my community on the common council. Working with previous Alders Steve King and Donna Mooreland on a specific development project, I was recently introduced to the common council political process. In making presentations to the council and our local community, I have become very interested in the process by which our community communicates to governing decision makers regarding local community issues. Our recent representatives have been very accessible and responsive in listening and voicing community concerns. I would like to make sure that this tradition is continued for our community. I am committed to invest the necessary time and effort to insure our concerns are respectfully presented to insure a proper response. I also believe my educational and work-related background offer a useful perspective to the council - Health and Safety, Educational Safety, Utility industry.

My primary goal in serving on the common council would be to ensure that I am an efficient, informed, responsive representative of our community. A piece of that goal is becoming proficient in the process to better serve. If selected, I will self-evaluate at the completion of the term to determine if I have accomplished these goals and consider a formal run for full term in the April election. Thank you for your consideration in reviewing my application. I look forward to working with the council.

David Sherrard, CSP, CIH | Industrial Hygienist
Alliant Energy
