Midtown Commons Park - Survey 1 Results

Midtown Commons Park - Master Plan Option 1:Please rank this option on overall favorability. Open-Ended Response 7 5	Midtown Commons Park - Master Plan Option 1: Are there specific features or aspects of the plan that you like? Why? Open-Ended Response Lots of green space, sledding hill, and potential I like the added paved paths through the park. This is how I primarily use the park currently. The sledding hill would be a fun feature for kids in the neighborhood.	Master Plan Option 1: Are there specific features or aspects of the plan that you don't like? Why? Open-Ended Response I would prefer something At this time, folks with dogs often use the open field as an off-leash dog park, despite the signs that dogs	Midtown Commons Park - Master Plan Option 1:Are there features not incorporated that you would like to see provided? Why? Open-Ended Response If moving forward with Option #1, I would like to see additional designated play areas for kids within this option. I would also like to see a designated, fenced-in dog area to make the boundaries clear for folks with dogs.
10	Playground and open fields! AND sledding hill!!	Can there be bathrooms please???	Bathrooms! Anything commercial we can walk to restaurants, pop up fairs, bigger shelters. No trees and will be so hot!
7	, 0	the current treeline. Many neighbors (myself included) would strongly dislike to see more of those trees felled	I love the nature play, bike path, and dog park ideas from the other plans. See my notes on those plans for more opinions about those.
	I still get occasional text messages from neighbors I don't know, asking if there are updates on when they'll be able to sign up for a garden plot. With more intentional recruiting and a visible public site, I think midtown commons park could easily fill and sustain a garden with 60+ plots (especially as the Hill Valley development brings in new neighbors to the North). This could be a site for community events, support local food resiliency, tighten community relationships, beautify the park, and more. This site in the southeast would work great for visibility and accessibility, and would allow us to start a garden in 2026 without waiting another year(s) for the construction in the North. The only significant roadblock (after a lease) would be water access. From conversations with Rooted, the simplest source for water while establishing a new garden is a fire hydrant hookup, and the nearest fire hydrant to this spot is		
2	I appreciate the open fields for athletic activities	No bike trail	I wish there was a pickleball court
0	none	needs playground and dog	option 3 features
0			Needs a dog park

0	the community garden and the managed meadow that I hope would be a niceprairie	I dont like how much mowed turf there is. it seems like overkill and way too many resources to mow all of that.	I would like to see a fruit tree guild area perhaps next to the community garden
2	Managed meadow areas are a nice way to brea up the park	Weird spot for community gardens. People working in garden adjacent to soccer balls flying around? Pretty steep area for the gardens too. Another athletic space? How many soccer fields do we need?	1-Dog exercise area. User fees should mean more dog parks. 2-Larger community garden space 3-Prairie area for pollinator habitat and walking trails.
1 10	The community garden I like the community garden and sledding Hill locations	Too many open fields. This I prefer the traditional playground to be moved closer to the open fields - perhaps that little piece of field between the managed Meadows would be a nice location	Tennis/pickleball courts. This will activate the field more. Should have something like this within walking distance but there's not
7	I love all the athletic fields. I have been playing ultimate frisbee with MUFA for 18 years and actually just played at Midtown last night. I like the community garden (I like gardening - it is a great way to get more healthy foods on the table). I like the sledding hill too - my family low sledding.	I don't like that the playground is so far from the athletic fields. We (and other frisbee players) often bring our children to frisbee games, and Midtown is the only field we play at regularly where there is no playground for the kids.	I wish this one also had a nature-based playground and single-track. Nature-based playgrounds are great for fostering kids' imaginations, and we don't have very many of them in the area. Our family is also a big biking family, and we often drive over to Aldo Leopold park to use the single track bike trail along the Cannonball Path. Even my 3 yo loved to ride it on his balance bike.
10	Additional athletic fields	Does the warm up area	
0

9	nature based play and dog park		
10	Dog park		
8	The nature-based play space is really interesting, and I like the idea of having that as an option for the families in the area. I like that this option retains the athletic fields but limits them to mostly the existing space, which is more than sufficient. I love the large amount of managed meadow space. The mountain bike path is a cool addition that I expect to be a draw for older kids. And as with option 1, I like the community garden, the amount new paved paths, and that we aren't caving to drivers and carving space out of the park for a surface parking lot.	the existing trees. It is already a travesty that the treeline was razed to the current extent. The mountain bike path in this option is a little short; I prefer the route outlined for	This option leaves out the sledding hill, which I would prefer is retained given the number of families in the existing Midtown Commons neighborhood plus the number of new families expected in the area with the development to the north. I do understand we are limited here given the topography but it would be great to include this if possible!

6	Like the walking and bike paths but these still need to connect to other trails. Like the community shelter and playground locations.	Not fond of a large dog park in the area at all. Bike paths but should be two- way and not a single lane. There's enough bike traffic in the area to expand the size.	There's nothing here that makes the park a destination. With the natural topography, could there be cross country skiing? Expanded bike trails? Water feature? There's no innovation in Any of these designs.
1		Too much area devoted to	acoigno.
2		I prefer more space for

	Managed meadow. Plus, looks like there will be paths through the managed meadow, which adds healthy recreation and learning opportunities.	Since there are other open field areas and a sledding hill nearby, I would like to see more area that could prioritize native prairie plants, since that it so important short-term for healthy recreation and learning, and long-term to help with flood mitigation, pollution mitigation, temperature regulation, biodiversity, food security (pollinator habitat), etc.	
10	I'd like to see a section for individual community garden plots. (Not sure if fruiting trees means individual plots as outlined on the map.). I have found that community gardens bring people together and help create social connections.	I hope the community garden section is big enough for individual plots not just fruiting trees.	I would like the community garden section to become available in spring of 2026. Thank you for your consideration and asking for input.
10	community garden!!	not that i can see	n/a
7	Managed meadows	no off street parking for sports & dog park	Plan for planting trees
10			
9	l like how much more tree coverage there is than the previous proposals	I'd like to see even more tree coverage. Managed meadow is good, but the ratio could be closer to 50/50 meadow to trees	More trees please
9	Dog park is good to keep them out of the open field area.	I would like to see the single-track extended to loop around the dog park to add additional length.	
10	Thrilled to have a dog park in our area. This neighbourhood has a huge population of pets!	No	I am not really sure how many bench's are going to be spaced throughout the park. We need more!
10	Dog park- definitely needed. There are a ton of dogs in this area.	I'm not sure where people not in walking distance will park	
10	DOG PARK! Community for the furbabies!	N/A	N/A
10	DOG PARK!!		Bigger dog park!
10	Dog park! It would be so nice to be able to walk down the street to	The amount of field area, kinda seems like a lot	
10	As long as a good number of new trees are planted in the "Lawn and Shade Trees" section as soon as is feasible given the development timeline, I think this proposal is the best-case scenario and I have no additional notes.		

10	Managed meadow is my #1 most important criteria. I don't care about you removing the tree hedgerows where needed, because the prairie is much more more important for native species that need the help.		no
10	Love the dog park and keeping the larger area for open field	I like the Community Garden (5), but that's located on an angled hill, so I'm not sure how that will be effectively implemented.	Not certain, but will the dog park be fenced? Will it be split into a big dog area and a little dog area?
8	I like that there is a dog park. Lots of people here have dogs and it will be nice to have a legal way to let them run off-leash. I like that there is NO parking lot being added. I don't think designated parking would be all that helpful and it would greatly take away from park space.		
7	Excited for the community garden space, as I have been working with a committee to obtain space for a community garden. There are many people who rent in the existing community and/or do not have ample space for a garden. The off leash dog park will offer a space for those who find it difficult to follow the current park rules.	the 31 votes received, or even half that many.	
8	I like the updates. I like the kids playground is proximate to the community garden so in theory there is oversight from parents who may be using that while kids play.	I don't love the location of the playground and garden. I think they should be to the West by the retention pond so they're slightly nestled in the park. Adding the proximity to the dog park would be one more layer of nice adjacencies with the playground and garden.	Make sure to plant trees around the playground that will grow tall, or provide a pavilion that could serve as a central spot between the dog park and playground which should be collocated with the dog park
7	The playground is much needed as there are not sufficient amount or sufficient sized playgrounds in the area.	The proposed playground area seems too small, especially given that it's on a hill. I think it's very important to a lot of families that the playground be large enough to support our community's needs.	An Inclusive or Boundless playground. These types of playgrounds would provide enough space for the high number of children in the area, features to draw all ages (encouraging safe and appropriate ways to spend free-time), and inclusion to all physical, emotional, and neurodivergent levels. Many playgrounds in the area lack the enticing and welcoming aspect of such playgrounds: they are small in size and age demographic, and show little forethought or care into the inclusion of all of our children. If the proposed area is too small for such a playground, there is plenty of space in the existing field near the current stormwater management pond.
9	Dog Park, I have a dog	Size of open field area, could be smaller, less open areas	More tree/tree protection, helps with flooding, wind, etc. If open field area smaller, more trees and paths.
9	I feel heard. I like the proposed locations in general. I like where the playground will be in relation to the fields.	putting the sledding hill back on the NW corner of the dog park & reduce the dog park by 1/4+ acre.	Ensure there is shade provided near the athletics and playground. Too many Madison playground without shade, don't make this same mistake.

	I like the dog park because I have a dog and it would be terrific if I could walk her to a park instead of needing to drive her to one. I am also interested in trying out the community garden. That is something I would love to try and get better at gardening.	park being flooded after heavy rain. I am late to this project, but if I was at the first meeting, I would have voted for a bigger dog park.	Some places to hammock would be fun. There are a couple of trees currently spaced perfectly for hammocking, but a few more would be nice.
	>15min drive away in Verona	overly concerned about this.	If some of the open field area were to be shade tree area, might help with any windiness or noise reduction, again not a huge concern, I do really like the plan selected. I also wouldn't mind the dog park being a little larger, more room for
