Recent scientific studies show that carbon emissions from our continued reliance on fossil fuels is leading to catastrophic climate disruption. We hereby call for immediate action to address climate change. The **Green New Deal** is federal legislation proposing a massive program of investments in clean-energy jobs and infrastructure, meant to transform not just the energy sector, but the entire economy. It is meant both to decarbonize the economy and to make it fairer and more just.

By signing this petition, we call upon ~~our local~~ City of Madison--choose one) elected officials to endorse federal legislation for a **Green New Deal**. The **Green New Deal** calls upon us to (1) decarbonize the economy, (2) include a federal jobs guarantee and large-scale public investments, and (3) implement a transition that protects low-income communities, communities of color, indigenous communities, and others most affected by climate change, pollution, and other environmental harm.

Agreed upon by the following people:

[illegible]

Recent scientific studies show that carbon emissions from our continued reliance on fossil fuels is leading to catastrophic climate disruption. We hereby call for immediate action to address climate change. The **Green New Deal** is federal legislation proposing a massive program of investments in clean-energy jobs and infrastructure, meant to transform not just the energy sector, but the entire economy. It is meant both to decarbonize the economy and to make it fairer and more just.

By signing this petition, we call upon (our local/City of Madison--choose one) elected officials to endorse federal legislation for a **Green New Deal**. The **Green New Deal** calls upon us to (1) decarbonize the economy, (2) include a federal jobs guarantee and large-scale public investments, and (3) implement a transition that protects low-income communities, communities of color, indigenous communities, and others most affected by climate change, pollution, and other environmental harm.

Agreed upon by the following people:

Recent scientific studies show that carbon emissions from our continued reliance on fossil fuels is leading to catastrophic climate disruption. We hereby call for immediate action to address climate change. The **Green New Deal** is federal legislation proposing a massive program of investments in clean-energy jobs and infrastructure, meant to transform not just the energy sector, but the entire economy. It is meant both to decarbonize the economy and to make it fairer and more just.

By signing this petition, we call upon (our local/City of Madison--choose one) elected officials to endorse federal legislation for a **Green New Deal**. The **Green New Deal** calls upon us to (1) decarbonize the economy, (2) include a federal jobs guarantee and large-scale public investments, and (3) implement a transition that protects low-income communities, communities of color, indigenous communities, and others most affected by climate change, pollution, and other environmental harm.

Agreed upon by the following people:

Recent scientific studies show that carbon emissions from our continued reliance on fossil fuels is leading to catastrophic climate disruption. We hereby call for immediate action to address climate change. The **Green New Deal** is federal legislation proposing a massive program of investments in clean-energy jobs and infrastructure, meant to transform not just the energy sector, but the entire economy. It is meant both to decarbonize the economy and to make it fairer and more just.

By signing this petition, we call upon City of Madison elected officials to endorse federal legislation for a **Green New Deal**. The **Green New Deal** calls upon us to (1) decarbonize the economy; (2) include a federal jobs guarantee and large-scale public investments; and (3) implement a transition that protects low-income communities, communities of color, indigenous communities, and others most affected by climate change, pollution, and other environmental harm.

Agreed upon by the following people:
