## Introduction

The City of Madison's Urban Design Commission (UDC) has been created to:

- Encourage and promote high quality in the design of new buildings, developments, remodeling, and additions so as to maintain and improve the established standards of property values within the City.
- Foster civic pride in the beauty and nobler assets of the City, and in all other ways possible assure a functionally efficient and visually attractive City in the future.

## Types of Approvals

There are three types of requests considered by the UDC:

- Informational Presentation. A request for an Informational Presentation to the UDC may be requested prior to seeking any approvals to obtain early feedback and direction before undertaking detailed design efforts. Applicants should provide details on the context of the site, design concept, site and building plans, and other relevant information to help the UDC understand the proposal and provide feedback. (Does not apply to CDR's or Signage Modification requests)
- Initial Approval. Applicants may, at their discretion, request Initial Approval of a proposal by presenting preliminary design information. As part of their review, the Commission will provide feedback on the design information that should be addressed at Final Approval stage.
- Final Approval. Applicants may request Final Approval of a proposal by presenting all final project details. Recommendations or concerns expressed by the UDC in the Initial Approval must be addressed at this time.

## Presentations to the Commission

The Urban Design Commission meets virtually via Zoom, typically on the second and fourth Wednesdays of each month at 4:30 p.m. Applicant presentations are strongly encouraged, although not required. Prior to the meeting, each individual speaker is required to complete an online registration form to speak at the meeting. A link to complete the online registration will be provided by staff prior to the meeting. Please note that individual presentations will be limited to a **maximum of three (3) minutes**. The pooling of time may be utilized to provide one speaker more time to present, however the additional time will be based on the number of registrants from the applicant team, i.e. two (2) applicant registrants = six (6) minutes for one (1) speaker.

Primarily, the UDC is interested in the appearance and design quality of projects. Emphasis should be given to the site plan, landscape plan, lighting plan, building elevations, exterior building materials, color scheme, and graphics. Please note that presentation slides, in a PDF file format, are required to be submitted **the Friday before** the UDC meeting.

LETTER OF WRITTEN INTENT

Dear Members on the Urban Design Commission,

The growing population of Jewish students at the University of Wisconsin underscores the necessity for an expanded Chabad building. This addition will not only accommodate the increasing demand for Chabad's programs but also provide a more functional and versatile space for various activities and events for students on campus. In addition, inclusion of student housing in the design will help the city of Madison meet the rising demand for student housing near campus.

The proposed new addition will be located adjacent to the existing historical building and a recent addition built back in 2017 (shown below). The proposed addition will preserve the historic façade and pickup on existing styles of the 2017 addition to create a harmonious and aesthetically pleasing overall façade. The columns, strategically placed along the street facing façade, serve as a unifying element, echoing the timeless elegance of the original addition. Not only are the two additions similar in design but, they also share similar materials further binding the additions into one.

I am confident that the proposed architectural enhancements will facilitate the organization's mission to foster inclusivity, cultural awareness, and community engagement. The design aims to create an environment that supports the diverse needs of the Chabad organization and Jewish student population, as well as, enhance the overall student campus experience.

Thank you for considering our project.

Sincerely,  
Hamid Noughani
