Smart Litter Containers

Committee discussion about the use of smart litter containers in Madison. Noted the Parks Department does use them in a limited way on the library mall. The largest benefit of these containers is the alert system available to communicate when litter containers are full and need dumping. However, since litter containers collected by the Streets Division are on existing refuse collection routes, and are dumped weekly by the refuse collectors during normal neighborhood collections, at present there is little apparent benefit to this style of litter container to be deployed throughout Madison.
