RE: Approval of a request to rezone 479 Commerce Drive from Planned Unit Development, General Development Plan (PUD-GDP) to Planned Unit Development, Specific Implementation Plan (PUD-SIP) allow construction of a hotel containing 119 rooms. (Raymond Management)

Dear Mr. Brink:

At its February 27, 2007 meeting, the Common Council **conditionally approved** your client's application to rezone property located at 479 Commerce Drive from PUD-GDP to PUD-SIP. The following conditions of approval shall be satisfied prior to final approval and recording of the planned unit development and the issuance of building permits:

Please contact Janet Dailey, City Engineering, at 261-9688 if you have questions regarding the following nineteen (19) items:

1. All pavement restoration shall comply with City of Madison patching criteria.
2. The applicant shall provide revised calculation to show the filling of the storm easement still allows the pond to function correctly. Further, the easement shall be re-recorded to show this new storm treatment area.
3. Prior to approval, owner shall enter into a developer agreement to install/ extend public storm sewer.
4. Prior to approval, owner shall dedicate easement for the proposed public storm sewer.
5. City records indicate that all pipes extending from sanitary structure or main in Commerce Drive are 4-inch laterals, not 8-inch pipes as indicated on the plan. Revise plan accordingly.
6. Transmittal of electronic CAD file to lzenchenko@cityofmadison.com of the Fire Protection Sheet 2.02 will suffice for necessary Storm Water Utility submittal.
7. The applicant shall obtain a privilege in streets agreement for any encroachments inside the public right of way. The approval of this development does not constitute or guarantee approval of the encroachments.
8. A City licensed contractor shall perform all work in the public right-of-way.
9. The plan set shall be revised to show a proposed private internal drainage system on the site. This information shall include the depths and locations of structures and the type of pipe to be used.

10. The applicant shall demonstrate compliance with Section 37.07 and 37.08 of the Madison General Ordinances regarding permissible soil loss rates. The erosion control plan shall include Universal Soil Loss Equation (USLE) computations for the construction period. Measures shall be implemented in order to maintain a soil loss rate below 7.5-tons per acre per year.
11. The City of Madison is an approved agent of the Department of Commerce. This proposal contains a commercial building and as such, the City of Madison is authorized to review infiltration, stormwater management, and erosion control on behalf of the Department of Commerce. No separate submittal to Commerce or the Wisconsin Department of Natural Resources is required.
12. If the lots within this site plan are inter-dependent upon one another for stormwater runoff conveyance, and/or a private drainage system exists for the entire site an agreement shall be provided for the rights and responsibilities of all lot owners. Said agreement shall be reviewed and placed on file by the City Engineer, referenced on the site plan and recorded at the Dane County Register of Deeds.
13. Prior to approval, this project shall comply with Chapter 37 of the Madison General Ordinances regarding stormwater management. Specifically, this development is required to detain the 2 & 10-year storm events; control 80% TSS (5 micron particle); provide infiltration in accordance with NR-151, and; provide oil & grease control from the first 1/2" of runoff from parking areas.
14. The Applicant shall submit, prior to plan sign-off, digital CAD files to the Land Records Coordinator in the Engineering Division (Lori Zenchenko). The digital copies shall be drawn to scale and represent final construction, including: building footprints, internal walkway areas, internal site parking areas, lot lines/ numbers/ dimensions, street names, other miscellaneous impervious areas.
15. The applicant shall submit, prior to plan sign-off, digital PDF files to the Engineering Division (Jeff Benedict or Tim Troester). The digital copies shall be to scale, shall have a scale bar on the plan set, and shall contain the following items: building footprints; internal walkway areas; internal site parking areas; lot lines and right-of-way lines; street names, stormwater management facilities and; detail drawings associated with stormwater management facilities (including if applicable planting plans).
16. The Applicant shall submit prior to plan sign-off, electronic copies of any Stormwater Management File including: SLAMM DAT files; RECARGA files; TR-55/HYDROCAD/etc. and; sediment loading calculations. If calculations are done by hand or are not available electronically the hand copies or printed output shall be scanned to a PDF file and provided.
17. The applicant shall obtain a Street Excavation permit for the installation of utilities required to serve this project. The applicant shall pay the permit fee, inspection fee and street degradation fee as applicable and shall comply with all the conditions of the permit.
18. The applicant shall obtain all necessary sewer connection permits and sewer plugging permits prior to any utility work.
19. The site plan shall be revised to show all existing public sanitary sewer facilities in the project area as well as the size and alignment of the proposed service.

Please contact John Leach, Traffic Engineering, at 267-8755 if you have questions about the following three items:

20. The application will need to comply with MGO Sec.16.23 (3)(d) – Highway Noise Land Use Provisions. The applicant should submit a noise study, for final approval and certification. The applicant shall submit plans to

the Planning Unit which show the noise barrier as built and relate and coordinate the certified noise site study report with grades, each corner of the building, outdoor living area or open space on the lot. These plans shall also include plans and specifications (e.g., manufacture's specifications for windows, doors, walls, etc.) identifying the sound attenuation measures to be incorporated into design and construction of the structure to reduce the interior traffic induced sound level to 52 dBA or less in the habitable rooms. Finally, the site plans shall be certified (stamped) by a Licensed Architect or Engineer accompanied by the following caption: Structure meets the interior sound level criteria (52dBA or Less) as set forth in MGO Sec. 16.23(3)(d) – Highway Noise Land Use Provisions.

21. When the applicant submits final plans for approval, the applicant shall show the following: items in the terrace as existing (e.g., signs and street light poles), type of surfaces, existing property lines, addresses, one contiguous plan (showing all easements, all pavement markings, building placement, and stalls), adjacent driveway approaches to lots on either side and across the street, signage, percent of slope, vehicle routes, dimensions of radii, aisles, driveways, stalls including the two (2) feet overhang, and a scaled drawing at 1" = 30'.
22. Public signing and marking related to the development may be required by the City Traffic Engineer for which the developer shall be financially responsible.

Please contact Scott Strassburg, Madison Fire Department, at 261-9643 if you have questions about the following item:

23. Provide fire apparatus access as required by Comm. 62.0509 and MGO 34.19 as follows:
 - a.) The site plans shall clearly identify the location of all fire lanes.
 - b.) Provide an aerial apparatus access fire lane that is at least 26 feet wide, with the near edge of the fire lane within 30 feet of the structure, and parallel to one entire side of the structure.

Please contact Kathy Voeck, Assistant Zoning Administrator, at 266-4551 if you have questions regarding the following three items:

24. Provide bike parking stalls (minimum of 1 stall per each 20 employees) in a safe and convenient location on an impervious surface to be shown on the final plan. The lockable enclosed lockers or racks or equivalent structures in or upon which the bicycle may be locked by the user shall be securely anchored to the ground or building to prevent the lockers or racks from being removed from the location. Note: A bike-parking stall is two feet by six feet with a five-foot access area. Structures that require a user-supplied locking device shall be designed to accommodate U-shaped locking devices.
25. Parking lot plans with greater than twenty (20) stalls, landscape plans must be stamped by a registered landscape architect. Provide a landscape worksheet with the final plans that shows that the landscaping provided meets the point and required tree ordinances. In order to count toward required points, the landscaping shall be within 15' and 20' of the parking lot depending on the type of landscape element. (Note: The required trees do not count toward the landscape point total.) Planting islands shall consist of at least 75% vegetative cover, including trees, shrubs, ground cover, and/or grass. Up to 25% of the island surface may be brick pavers, mulch or other non-vegetative cover. All plant materials in islands shall be protected from vehicles by concrete curbs.
26. Lighting is not required. However, if it is provided, it must comply with City of Madison outdoor lighting standards. (See parking lot packet for more information). Lighting will be limited to .08 watts per square foot.

Please contact my office at 261-9632 if you have questions about the following two items:

- 27. That the PUD-SIP zoning text for the project be amended per Planning Division approval to eliminate the names of the hotel operator from the statement of purpose and note the lot area and floor area ratios as “As shown on the attached plans.”
- 28. That a note be placed on the plans stating that the traffic-induced interior noise levels of the proposed hotels will not exceed 52 decibels as indicated in the Ganser Heights Noise Abatement Study dated December 21, 2006.

After the plans have been changed as per the above conditions, please file **eight (8) sets** of the revised, complete site plans, building elevations, floor plans and any other documentation requested herein with the Zoning Administrator, Room LL-100, Madison Municipal Building, 215 Martin Luther King, Jr. Boulevard. The sets of final revised plans or documents will be circulated by the Zoning staff to the City department staff listed above for their signature of final approval.

Upon receipt of the aforementioned plans, documents and fees, and upon determining that they are complete, the Zoning Administrator shall record them with the Dane County Register of Deeds Office. The recorded originals will be returned to the applicant, with the recording information noted, when the Register of Deeds has completed the recording process.

If this plan is not recorded within one year of the date of approval by the Common Council, the approval shall be null and void. No construction or alteration of the property included in this application shall be permitted until a Specific Implementation Plan (SIP) has been approved and recorded.

Within thirty-six (36) months of Common Council approval of the general development plan, the basic right of use for the areas, when in conformity with the approved specific implementation plan, shall lapse and be null and void unless 1) the project, as approved, is commenced by the issuance of a building permit, or 2) if an application for an extension is filed at least thirty (30) days prior to the expiration of the thirty-six (36) month period and the Plan Commission, after a public hearing pursuant to Sec. 28.12(10)(e), determines that no changes in the surrounding area or neighborhood since approval of the general development plan render the project incompatible with current conditions and grants an extension of up to twenty-four (24) months in which to obtain a building permit. In no case shall an extension allow a building permit to be issued more than sixty (60) months after approval of the general development plan by the Common Council. If a new building permit is required pursuant to sec. 29.06(4), Madison General Ordinances, a new petition and approval process shall be required to obtain general development plan approval and specific implementation plan approval.

If you have any questions regarding recording this plan or obtaining permits, please call Matt Tucker, Zoning Administrator, at 266-4551. If I may be of any further assistance, please do not hesitate to contact me at 261-9632.

Sincerely,

Timothy M. Parks
 Planner
