

Note to Commission:  
Italian Workmen's Club  
914 Regent Street  
Designated Landmark

The applicant is proposing a new metal roof for the Italian Workmen's Club.

While the Commission has approved metal roofs in the past, and staff believes that a metal roof application would be an appropriate treatment for the building, we cannot determine the appropriateness of this roofing material without seeing a larger sample or photograph of the roofing material on a building.

The applicant will be bringing in a sample for the Commission to consider.

Respectfully submitted,  
Rebecca Cnare and Bill Fruhling
