I have some questions about this project specifically about proposed side walks or multipurpose path. Would the the area for side walk or path come out of the street since the street seems to be narrower in the pictures or would the city use their right of way and cut down trees to make the sidewalk or pathway. Would there be a barrier between the walk/path and the rd? I am also worried about having to shovel this area as I have a double lot (very wide) and also am old, Also worried about costs of this project. Hopefully someone will be able to answer my questions.
