

Williamson St. Reconstruction – 2011

BPW Meeting 12/1/10

Progress Since 10/20 Public Hearing

- City staff met with members from the neighborhood & businesses on 11/3 & 11/16
- CE & TE met with small group to discuss bikes/peds from Blair St. to Blount St. on 11/8
- CE & Forestry met with small group to discuss planned tree removals 11/29
- Received detailed list of suggestions from MNA & GWABA on 11/23 & 11/30 respectively
 - City staff met to discuss and responded in agreement to most positions on 11/30

Changes to Plan

- Revised geometrics between Blount & Jenifer to narrow lanes and widen the bike path for separation of pedestrians & bikes
- Added overhead “Yield to Pedestrian signs” & another colored cross-walk at Livingston
- Added a mountable island on west leg of intersection with Brearly
- Rain gardens on side streets
- 2 test locations for infiltration at new tree planted in engineered media in depressed terrace
- Commitment to continue to work with neighborhood on trees & overhead utilities
- Outlets to be installed on a few light poles for use during events such as the Willy St. fair

Overall Summary of Improvements

1. Replace street infrastructure – curb and gutter, base course, pavement, san sewer & laterals, water main & lead laterals, storm sewer, street lighting, traffic signals, driveway aprons & sidewalk as needed
2. Narrow street to 44 ft. between Blount & Baldwin
3. Wider, mostly grass terraces – able to better protect existing trees, and space to replant larger trees
4. Strict specifications & planning in design for tree protection, and input from neighborhood regarding new plantings
5. Install conduit for future undergrounding of overhead utilities with minimum impact on the new street
6. Traffic islands at Brearly & Few for traffic calming & pedestrian refuge, with no additional parking lost (mountable island to west of Brearly)
7. Bump-outs on select side streets for better pedestrian crossings
8. Colored cross-walks at Livingston St., Few St., Brearly St., and Dickinson St. for better visibility of cross-walk
9. Overhead signs for the cross walks at Livingston, Brearly, and Few
