

Sherman Middle School Mural Proposal

Proposed location

Proposed wall

Proposed plan

The overall mural size will be approximately 250-260 sq ft. It will be located on the south facing wall at the far east corner, with a small part possibly wrapping onto the east facing wall. We will be painting either directly on aluminum core boards or on polytab which will be wrapped onto boards or a combination of the two. The MMSD will install using bolts in the mortar. We are hoping this can be installed later this year, but that will be weather dependent.

This mural design is inspired by youth voices in response to the prompt, “what does dreaming fearlessly feel / look like to you?” We have incorporated their voices into the following proposed designs and plan to have staff and students vote on a basic design before finalizing. At that point we will bring the design with color and full detail back to the Commission for final review and approval.
