

Rough design of horizontal Dunn's Marsh Neighborhood sign to be placed on the Beltline Frontage Road at 1806 Seminole Highway. Approximate size of the main part of the sign is 3x6 feet with posts putting it 18"-24" off the ground. Total height from ground would be about 5 feet.

Colors are approximate. Green part of sign would be textured and inset below the plane of the black framing. The symbol would not have white around it, and the orange might be more variegated, like a sunset. The lettering would be more elegant and probably shadowed.

Final design would be made by Susan Cary of Cary Signs. She will finalize the design once we have officially contracted with her. We will do this as soon as we have city permission to locate the sign on the frontage road.

This rough design was constructed by Mary Mullen based on the previous vertical sign. 3/28/12.
