

Lakeview Reservoir Pipeline Improvements, Phase 2
MUNIS # 10439
Contract #7452
Alder District 18

Project Summary

The second phase of the Lakeview Reservoir Pipeline Improvements project will continue Madison Water's effort to improve the piping grid around the newly reconstructed Lakeview Reservoir. The reservoir was upgraded to a two-zone facility serving Pressure Zones 6E and 5 in a large portion of the north and east sides of Madison. The primary objective of the second phase of the project is to replace an aging and undersized transmission main from Northport Drive to the reservoir. Other portions of the project will replace old, break-prone main and add new main to bring improved hydraulic connectivity, reliability and redundancy to the Zone 5 pipe network. In addition, there will be a relatively small portion of street and storm sewer work as part of the project.

The proposed resolution approves plan documents at a total estimated cost of \$923,000. The cost of the work is broken out across agencies as follows:

10439-402-170	STREET	\$20,000
10439-402-174	STREET STORM	\$20,000
10439-84-174	STORM	\$55,000
10439-86-179	WATER	\$828,000
