

Treating violence as a contagious health issue

Like the infectious diseases in our history, violence is better understood and more successfully treated as an epid

Ranked #12 in Top 500 NGOs in the World by NGO Advisor

Cure Violence stops the spread of violence in communities by using the methods and strategies associated with disease control – detecting and interrupting conflicts, identifying and treating the highest risk individuals, and changing social norms – resulting reductions in violence of 40% to 70%.

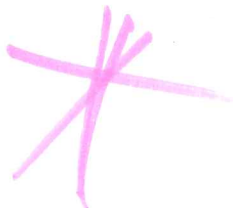

Gary Slutkin at TEDMED

Scientific Evaluations

Read the scientific studies that show our success and make the Cure Violence Health Model an evidence-based model.

How To Implement

Find out the steps to bringing the Cure Violence model to your community - for any type of violence in any area of the world.
