P.O.L.D.

PLACE OF LAST DRINK

Helping Retailers Put a Cork in Over Service

POLD seeks to identify the location where a person last consumed alcohol when they are involved in an alcohol-related incident (DUI, assaults, and other offenses).

We hope that providing information on problem trends will help retailers be able to improve serving practices and eventually reduce alcohol-related incidents in the community.

It's free/no cost to join or collect data.
Founding Departments: Brooklyn Center, Osseo, Plymouth

Information collected by the investigating officer is entered into a database (takes <1 minute) and allows departments to concentrate education and enforcement efforts towards areas of concern.
