See detail map on next page.

Draft Revised Map Notes

1. Any redevelopment within this LMR area should generally add to the City's Missing Middle housing stock while maintaining the current single-family/ two-flat/three-flat development rhythm.
2. The University of Wisconsin-Madison Campus Master Plan provides detailed land use and development recommendations for the UW-Madison. That document was approved by the City in 2017 as part of the requirements for the UW-Madison's Campus-Institutional Zoning. All UW-Madison development within the campus boundary must be consistent with the Campus Master Plan unless an exception or alteration is approved by the City, consistent with applicable regulations, procedures, and standards. The Comprehensive Plan's SI designation for the UW-Madison campus is primarily to address the UW's use of property. However, there are some privately owned properties within the SI-designated areas. If such privately owned parcels redevelop, their use and design should be consistent with adopted sub-area plans, the most relevant of which, as of the adoption of this Plan, is the Regent Street-South Campus Neighborhood Plan. In the rare case where private redevelopment is proposed for an area that is not covered by a sub-area plan, multifamily residential and mixed-use development shall be considered appropriate, so long as the scale, massing, and design of the building fits in with the surrounding context, as determined by the Plan Commission and City Council.
3. This property is currently the site of the State of Wisconsin Mendota Mental Health Institute. A detailed development plan for the property should be prepared and adopted by the City prior to any redevelopment to new uses. Land along Lake Mendota is recommended for public park and open space.
4. Refer to the Downtown Plan for the area bounded by the lakes, Blair Street, Regent/Proudfitt Streets, and Park Street for viewshed preservation, mix of land uses, building design standards (including heights and setbacks/setbacks), streetscape design, and other land use and design elements. Note that residential uses shown in this area should be considered "primarily residential," as defined in the Downtown Plan.
5. The Alliant Energy Center is shown as SI, but may include restaurant, entertainment, and hotel uses if a Master Plan for the area that includes those uses is adopted by the City. Such a Plan may include land use changes to surrounding properties, such as the Employment-designated properties to the north.
6. The existing residential uses may continue until an opportunity arises to convert this area to public park and open space. The existing uses should not be expanded and the land should not be redeveloped.
7. This former sanitarium site is presently owned by Dane County and used as an office building. Adaptive reuse of the existing buildings for employment, residential, or a mix of those uses is recommended if this site is redeveloped. The open area south of the buildings should remain undeveloped and any reuse of the site should be designed to preserve and enhance the views from the site to Lake Mendota and the isthmus. The wooded portion of the site north of the buildings should be maintained as open space.
8. It is recommended that there be no additional development on the top portion of this hill. Future development may be allowed around the lower portions of this hill only if such development is done with sensitivity to the topography in a manner that preserves open space and views to the hill from surrounding properties and provides adequate vegetative buffers from the existing park property.
9. The City may consider buildings taller than four stories in this contiguous NMU area for large parking lots/vacant areas.
10. It is not recommended that the mobile home park that currently occupies this area cease operations, but employment is the most appropriate future use of the property if the property owner does close the park.
11. Land in this area is part of the Town of Blooming Grove and will be attached to the City before November 1, 2027. This land should either continue in its current agricultural use or be incorporated into the adjacent Capital Springs State Recreation Area.
12. A portion of this area may have the potential for limited development as a conservation subdivision.
13. The majority of this site is undeveloped - a detailed plan for any change in use should be approved by the City prior to consideration of any rezoning request.
14. If restoring the high ground east of Underdahl Road to open space is not feasible this area should transition to residential development.
15. An Interstate interchange in this general location would help implement higher intensity employment and mixed use land uses planned for this area.
16. Property solely accessed from Grand Canyon Drive and/or West Platte Drive south of Odana Road should not be redeveloped with residential uses until redevelopment of properties accessed from Odana Road occurs in a manner that increases access and visibility.
17. Buildings may be considered up to two stories taller than the maximum height in the Regent Street-South Campus Neighborhood Plan for property designated as mixed-use along the north side of Regent Street, mixed-use along the south side of Regent Street between Randall Street and Mills Street, Employment at the southeast and southwest corners of the Regent Street and Park Street intersection, and Special Institutional along Monroe Street between Regent Street and Randall Avenue.
18. Buildings up to 10 stories tall may be considered in High Residential (HR) areas south of Spring Street that overlap the Regent Street-South Campus Neighborhood Plan and up to 12 stories tall in HR areas north of Spring Street that overlap the Regent Street-South Campus Neighborhood Plan.
