Applicant: Heather Marley

Applicant's Comments: We would like to demolish our current house at 733 Copleand Street and build a new single-family home. The new home would be moved into the center of the lot to be more in line with the other homes on our block and we would then add a detached garage in the rear corner of the lot. From this demolition and rebuilding we hope to gain a more accessible basement, more square footage, and a detached garage.

Staff findings: A preservation file for this property does not exist.
