Mike, the plan does call for a drop off separate from the street. That is consistent with what was shown on the site plan when the project was approved by the CC.

Rob.

I have concerns about Agenda Item 10. Not sure if they are justified because no drawings came in the packet.

If there is a separate/separated pull-out for loading and discharging hotel guests, I am against it. It detracts from the wide-terrace beauty of West Wash. And I believe it is in conflict with the neighborhood plan. It will also have negative impacts on pedestrians, motor vehicles and bikes who are simply passing by.

I support a slightly widened curb side area (say 4 feet.) so that guests can load and discharge street side. This is no different than most big city hotels.

Please pass on to committee members.

Thanks. Mike
