**Subject:** Bike lights

Brian,

I am a property owner next to and a frequent user of the SW Bike path. I will not be able to attend the Hearing November 28<sup>th</sup>. I am strongly in favor of the lights. For those opposed, have you considered motion detectors that would turn on lights for 2-10 minutes? Ideally it would turn on the nearest 3-5 lights.

I have a related request. Being frequently at the receiving end of blinding bike lights that actually prevent seeing anything forcing me to stop as well as migraine provoking blinking lights, could there be some informational signs installed? Something like-

Please aim your bike lights down to prevent blinding your fellow bikers  
and

While on the path, blinking lights are not necessary and cause migraine headaches.  
Please be considerate
