Hello,

I am a resident who lives in the area and I have taken this particular road many hundred times in my life. The largest concern I have is sometimes people waiting to turn left onto mineral point will wave people trying to leave kwik trip through, and I have had a couple near misses as the people who are leaving kwik trip cannot see the southbound traffic they are trying to merge into. I have not experienced much if any difficulty with traffic backups while turning left onto mineral from high point road. It may take a few light cycles at most, but I do not believe a minute or two wait necessitates any lane additions or expansions. The money and land could otherwise be put to a better use in my opinion.

Additionally, I have had a few near misses with people turning left onto mineral point while I am traveling southbound on highpoint, as they can sometimes not see southbound traffic as the southbound traffic makes its way up the hill into the intersection.

Thank you for your time,
AJ
