If amount of Miscellaneous Credits to Surplus (Acct 434) exceeds $10,000, please explain fully.

The Utility received $269,870 from the City for Antenna money for revenue received in prior years.
2007 Year end adjustment per our auditors to record as a receivable a contribution to plant for a security camera grant from the federal government.
As a part of the journal entry to absorb Burke Utility District #1 - this is the amount of contributions on their books that originally was credited directly to 216.2
$146,642 is the excess value of Burke Utility District #1 assets that were absorbed by Madison Water Utility in 2008.

If amount of Miscellaneous Debits to Surplus (Acct 435) exceeds $10,000, please explain fully.

This amount appeared as a 2007 Year End Journal entry at the time of our audit for the new GASB 45-OPEB Liability as recorded by the Utility. This was before the PSC allowed the recording of this expense and liability.

FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

Water Operation & Maintenance Expenses (Page W-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 15%, but not less $10,000, please explain.

Account 612 - Maintenance of Reservoirs: Decrease due to security upgrades (hatch covers) that were closed in 2007.

Account 620 - Pumping Supervision: Increase due to vacancty in supervisory position in 2007, filled in 2008.

Account 633 - Maintenance of Pumping Equipment: Increase due to complications on UW26 rehabilitation and higher SCADA maintenance and upgrade costs.

Account 640 - Treatment Supervision: Increase due to vacancy in supervisory position in 2007, filled in 2008.

Account 641 - Chemicals: Increase due to higher cost of chemicals.

Account 643 - Treatment Supplies: Decrease due to fewer lab supplies needed for water quality sampling.

Account 652 - Maintenance of Treatment Equipment: Increase due to continued implementation of standard operating procedures for chlorine residuals in the water.

Account 660 - Supervision and Engineering: Increase due to vacancy in supervisory position in 2007, filled in 2008.

Account 662 - Operation of Hydrants and Distribution Lines: Decrease due to fully established unidirectional flushing program and less administrative costs for maps and coordination.

Account 672 - Maintenance of HS Reservoirs: Increase due to additional reservoir maintenance including inspections, replacement of expansion joints, and Sprecher Tower touch-up painting.

Account 675 - Maintenance of Services: Decrease due to closing a smaller number of WIP replacement jobs than 2007, when the cost of removal was much greater than PSC guidelines allowed.

Account 677 - Maintenance of Hydrants: Increase due to the flushing crew now focusing on hydrant maintenance during the months that flushing is not possible.

Account 902 - Meter Reading Expense: Increase due to additional coverage needed reading meters in 2008.

Account 921 - General Administration Expense: Increase due to costs associated with recruitment and hiring of three management positions. Also increased maintenance cost at our main office, vehicle storage building and grounds.

Account 923 - Outside Services Employed: Decrease due to closing 3 projects in 2008, while 5 were completed in 2007.

Account 925 - Injuries and Damages: Increase due to higher Workers Compensation than in 2007.

If Employee Pensions and Benefits (926) is zero, yet salary expense accounts exceed $15,000, please explain.

Increase is due to higher benefit costs and the inclusion of the accounting for GASB45 liability for other post employment benefits (OPEB).

Meters (Page W-21)

Explain program for replacing or testing meters 1" or smaller.

Meters Tested, Replaced - we are working towards a 15 year replacement schedule for 1" and smaller meters. We are performing periodic tests for 5/8", 3/4" and 1" meters under PSC 1685.76(6)

Ss. PSC 185.83(2) states "Station meters shall be maintained to ensure reasonable accuracy and shall have the accuracy checked at least once every 2 years." Are all station meters being tested every two years? Answer yes or no. If no, please explain.

Yes

If 6-inch or larger meters in commercial, industrial or public authority classifications have not been tested, please explain.

All 6" or larger meters are tested.

HYDRANTS AND DISTRIBUTION SYSTEM VALVES

1. Distinguish between fire and flushing hydrants by lead size.
   a. Fire hydrants normally have a lead size of 6 inches or greater.
   b. Record as a flushing hydrant where the lead size is less than 6 inches or if pressure is inadequate to provide fire flow.
2. Explain all reported adjustments in the schedule footnotes.
3. Report fire hydrants as within or outside the municipal boundaries.

General footnotes

In a letter dated November 25, 1997, the Madison Water Utility requested a waiver of the two year valve operation cycle. On January 28, 1998 we received a letter from the Public Service Commission of Wisconsin authorizing our request for an extension of the valve operation cycle from two to four years.
