

Healthy Marketing and Procurement March Report

Our committee met on Monday at UW Cooperative Extension. Our entire committee was in attendance.

We reviewed our mission and the food procurement guidelines of the LA policy. We decided as a group that we would focus on the food procurement piece of our mission first and then marketing.

We have contacted Minneapolis and Chicago to review their food procurement policies. We plan to have a draft resolution for a healthy procurement "pledge" for the city council to approve by March 25th, and for approval by the full FPC meeting by April.
