

WINTER

A COOLER WORLD CARNIVAL

1.

WELCOME!

Winter is Alive! A cooler world carnival is a different kind of carnival. Instead of rides and funnel cake, there is beautiful art and cool videos about climate change. Winter is Alive! will get you to think about climate change, and maybe even talk to your friends about how you can help keep winter alive for decades to come!

¡El invierno está vivo!
Un carnaval mundial más fresco es un carnaval diferente. En lugar de atracciones y pastel de embudo, hay bellas obras de arte y videos geniales sobre el cambio climático. ¡El invierno está vivo! te hará pensar en el cambio climático y tal vez incluso hablar con tus amigos sobre cómo puedes ayudar a mantener vivo el invierno durante las próximas décadas!

5. Impact

Long Term

ps. you can read and color anything on this page!

16 billion disposable coffee cups are used each year. These are coated with plastic to laminate the inside and use plastic lids

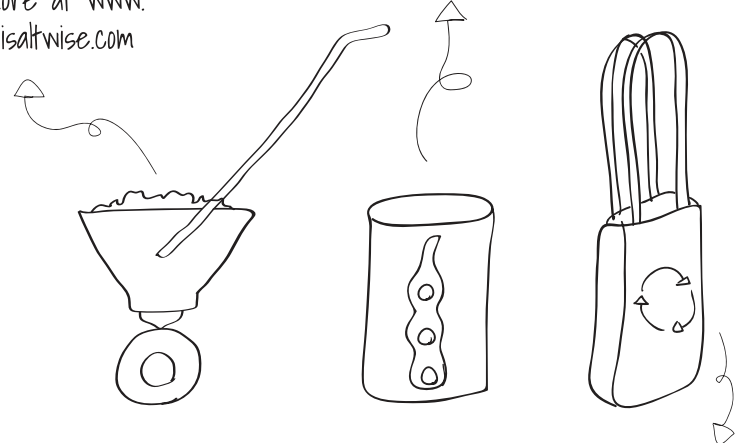

Currently, the average American discards about 80 pounds of clothing each year, 85 percent of which ends up in landfills (15% recycled).

Cars and light trucks emitted 11 billion metric tons CO₂e or 17% of the 2017 total U.S. greenhouse gas emissions

While municipalities across Wisconsin are working to reduce salt use by 30 - 70%, collective effort is needed to protect our freshwater ecosystems. Learn more at www.wisaltwise.com

If people worldwide were to adopt a complete vegetarian diet, it could reduce carbon emissions by 63% by 2050, and by 70% for a vegan diet.

One person using reusable bags over their lifetime would remove more than 22,000 plastic bags from the environment.

We adults
 escalate
 situations.
 Earth's
 vibrations
 penetrate our
 ability to
 elevate collective thinking.
 Some say we are sinking into a
 situation that is
 uncontrollable.

But Mother Earth
 is soulful, she
 understands our motivations.
 We cannot situate
 ourselves in mediocre
 mindsets, our best is
 her beautiful green; her clouds and
 other lovely natural things.
 May your dreams
 be full of glory to anticipate,
 full of visions to celebrate.

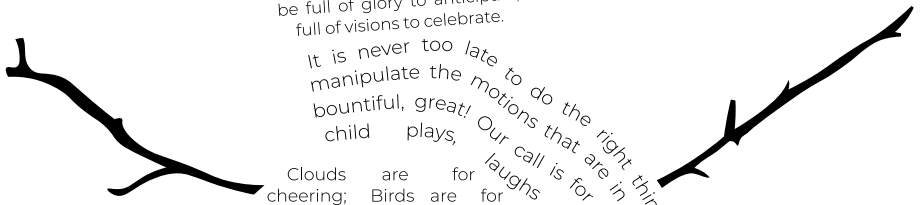

It is never too late to do the right thing! We can
 manipulate the motions that are in pace to find a
 bountiful, great! Our call is for everyone. For every
 child plays, laughs under the sun.

Clouds are for cheering; Birds are for
 endearing; The songs of
 waterfalls are for our
 hearing. The wonderful
 shining, solid ice is for our clearing when it
 is winter time - that divine time when we
 humans take the time to think, slow down,
 slumber, move under the moons and
 stars with solace and calm. We
 cannot wait to anticipate a cleaner,
 healthier world where we can see fish
 swimming in lakes, where we can watch
 bears snatch salmon as they migrate, where
 we see lightning strike the bark off trees,
 where we can see bees create honey for our
 sake. We are Earth's vessels, yet we violate everything
 she stands for. The polluted highways, she is drinking
 those fumes. We are better than the fate that looms. We
 can make room for more magic, more songs at the fire
 under the stars, more sleeping bags at your grandparent's
 cabin by the long lake. We should all be happy on this
 planet, as we share it. You, one day, you will be responsible
 for this earth you will inherit.

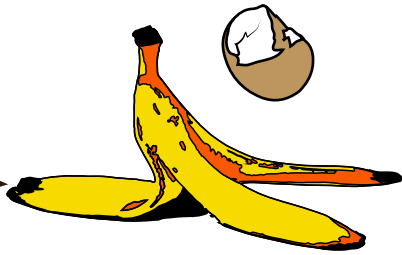

Poem by Christopher D. Sims

Christopher D. Sims started writing poetry when he was 10 years old. Honing his gifts for Creative Writing in Rockford, IL, he has used writing to reach, teach, and impact individuals and communities.

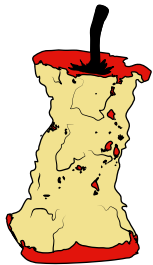

Christopher D. Sims comenzó a escribir poesía cuando tenía 10 años. Perfeccionando sus dotes para la escritura creativa en Rockford, IL, ha utilizado la escritura para llegar, enseñar e impactar a las personas y las comunidades.

FOOD & ORGANIC MATERIAL

Don't throw your food in the trash, it releases harmful gasses and can't decompose! These gases add to climate change, but don't worry! If you compost instead, the food scraps are able to breakdown without creating harmful pollutants!

No tire la comida a la basura, ¡no se puede descomponer ni liberar gases nocivos! Estos casos se suman al cambio climático, ¡pero no se preocupe! En cambio, si usa abono, los restos de comida pueden descomponerse sin crear gases nocivos.

NEW GROWTH

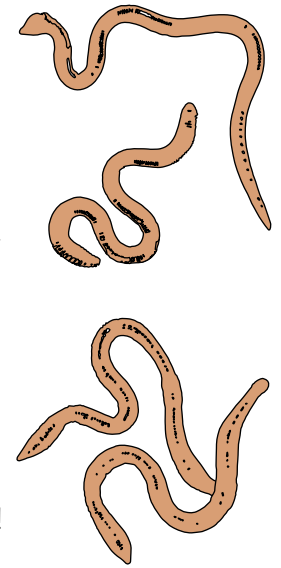

Composting helps make healthy soil and air! It also takes dangerous gases out of the air that create air pollution. This is good news for the people who breathe the air and plants that grow in it!

¡El compostaje ayuda a que la tierra y el aire sean saludables! También elimina los gases peligrosos del aire que lo contaminan. ¡Esta es una buena noticia para las personas que respiran el aire y las plantas que crecen en él!

WORMS & MICROORGANISMS

You can compost with worms! It is slow but adds healthy nutrients back into the soil and helps microorganisms! These tiny living things are important! They break down toxins caught in the soil and stop them from entering the water. They also help grass and flowers grow to feed the animals, which all builds a healthy earth!

¡Puedes compostar con lombrices! Es lento pero agrega nutrientes saludables al suelo. ¡Estos pequeños seres vivos, llamados microorganismos, son importantes! Rompen las toxinas atrapadas en el suelo y evitan que entren al agua. También ayudan a que la hierba y las flores crezcan para alimentar a los animales. Todo esto construye una tierra sana.

15.

Write about or draw your favorite part of winter!

¡Escribe o dibuja tu parte favorita del invierno!

Sara Meredith

COMMUNITY ORGANISM

Community Organism is meant to engage people in thinking about climate change by having a sculptural deep sea creature that people can add to when they take personal responsibility to take an action to combat climate change via a pledge.

Community Organism está destinado a involucrar a las personas en pensando en el cambio climático teniendo un esculturalcriatura de las profundidades marinas a la que las personas pueden agregar cuando asumen la responsabilidad personal de tomar una acción para combatir cambio climático a través de una promesa.

GIANT SIPHONOPHORE: PAPA DUBIA

A deep sea invertebrate comprised of many individual organisms called zooids that cannot survive without the colony they are a part of.

Un invertebrado de aguas profundas compuesto por muchos organismos individuales llamados zooides que no pueden sobrevivir sin la colonia de la que forman parte.

Why are artists important to activism?

In activism in general, there is a certain portion of the population who just want to ignore the issue. Art has a power to connect to a deeper level & open minds while pushing boundaries.

En el activismo en general, hayes una cierta parte de la población que solo quiere ignorar el problema. El arte tiene el poder de conectarse a un nivel más profundo y mentes abiertas mientras empuja los límites.

How old were you when you started in art?

I was in elementary school! I remember they did an Artist of the Week where every week a different student piece was celebrated. It was the first time I saw art, and my art, celebrated likethat. I was really lucky to have supportive art teachers.

¡Estaba en la escuela primaria! Yo recuerde que hicieron una Artista de la Semana donde cada semana se celebraba una pieza de estudiante diferente. Fue la primera vez que vi arte, y mi arte se celebró así. Tuve mucha suerte de tener profesores de arte que me apoyaron.

What would you tell young artists?

It's okay if you don't feel like professional artist. I see artists who make sculptures for a living and I think "My piece doesn't look like that" but that's okay. My goal isn't to have the most perfect sculpture, my goal is to work with the community. So sometimes, I feel less than. But in other ways, I feel fantastic because I've created something with the community.

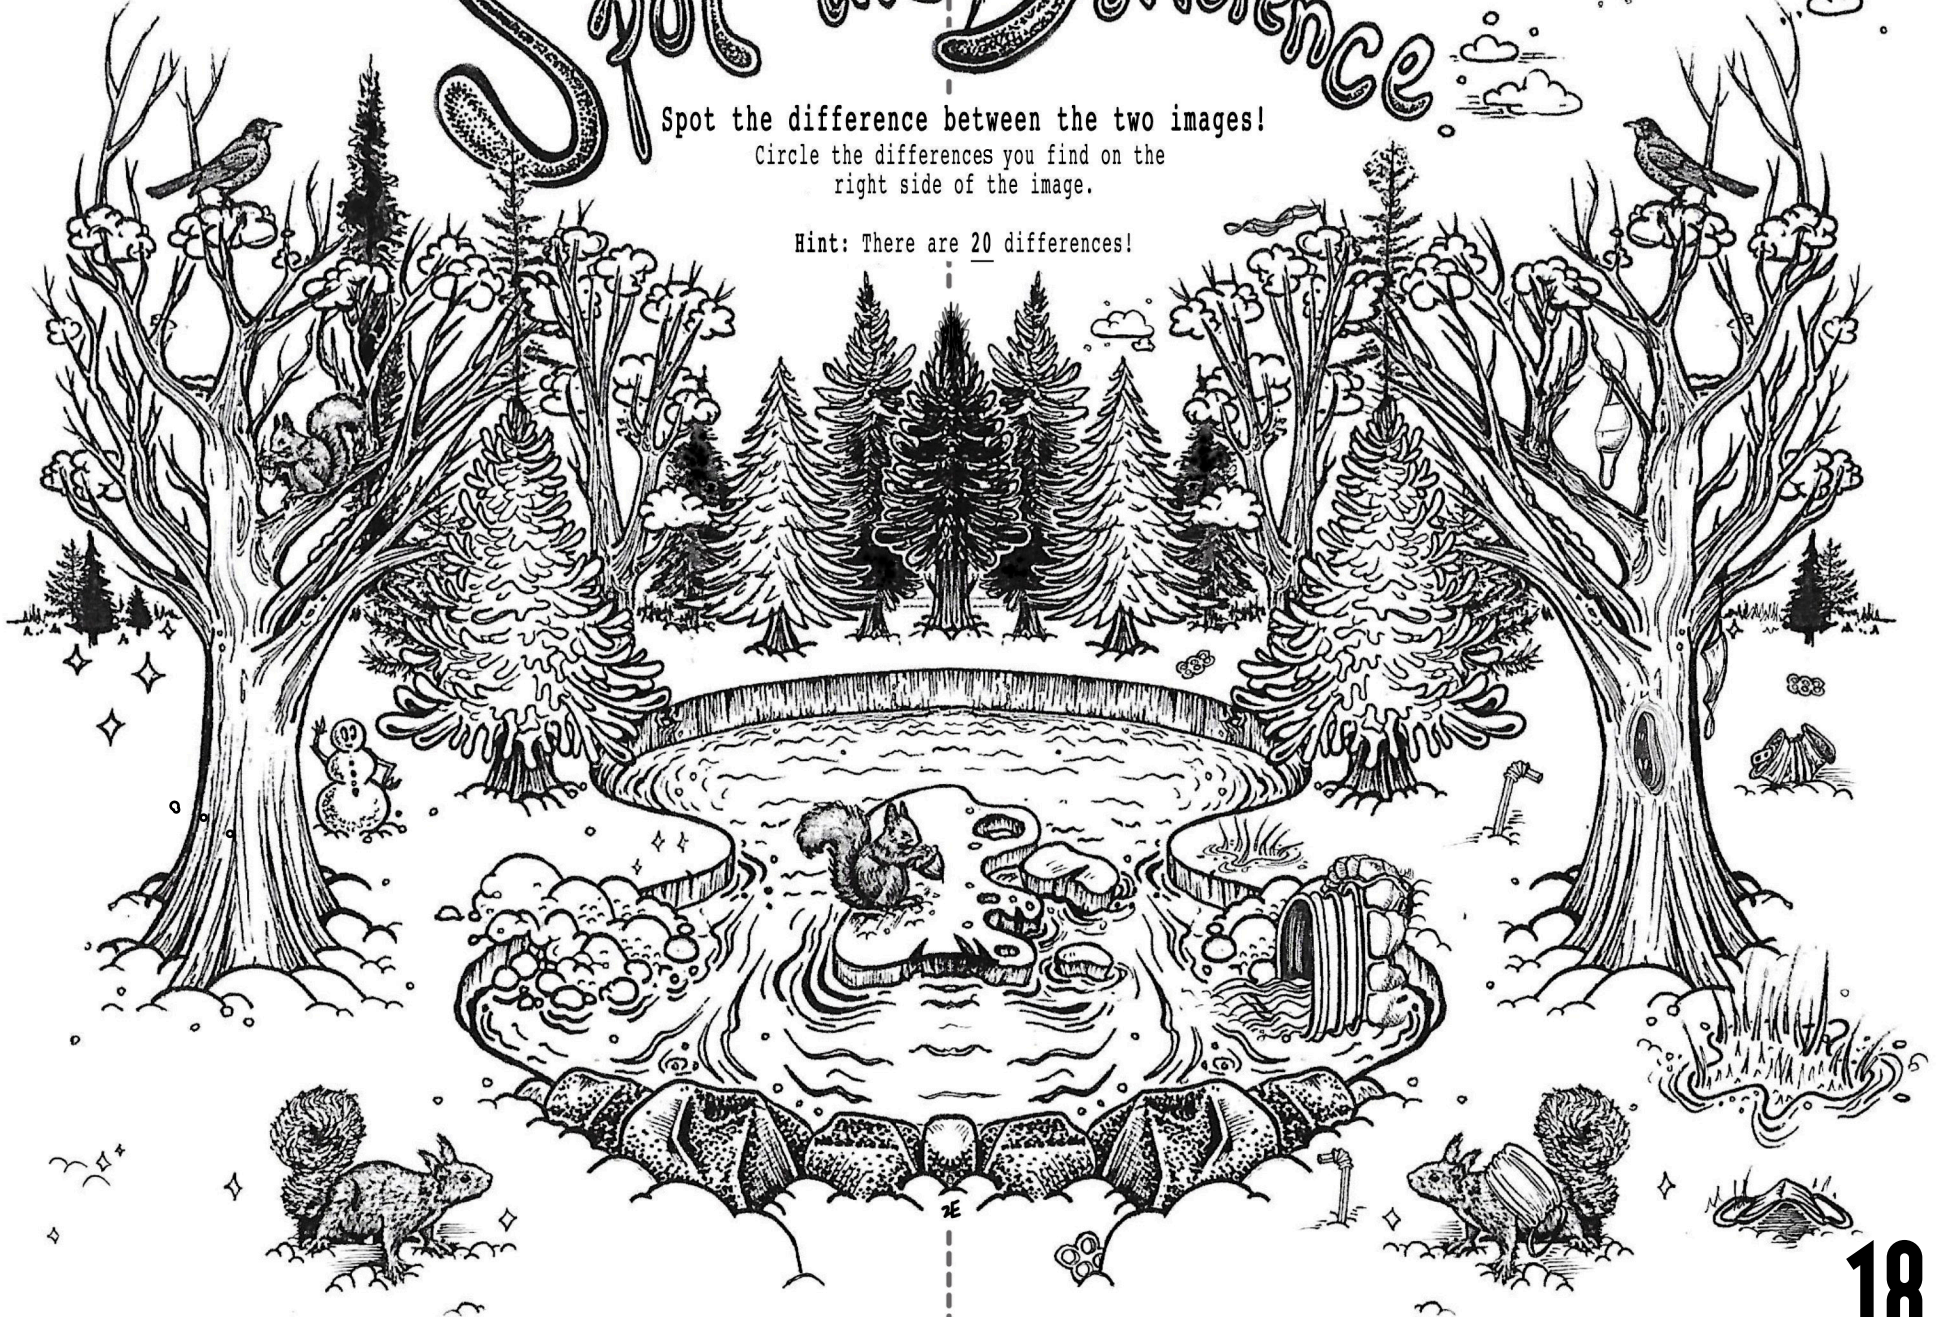

Está bien si no te apeteceartista profesional. Veo artistas que hacen esculturas para ganarse la vida y creo que "Mi pieza no se ve así", pero está bien. Mi objetivo no es tener la escultura más perfecta, mi objetivo es trabajar con la comunidad. Entonces, a veces, me siento menos. Pero de otras formas, me siento fantástico porque he creado algo con la comunidad.

Spot the Difference

Spot the difference between the two images!
Circle the differences you find on the right side of the image.

Hint: There are 20 differences!

Find the words in the puzzle from the word list on the right. Words can be upside down, diagonal, and intersecting.

Encuentra las palabras en el rompecabezas de la lista de palabras a la derecha. Las palabras pueden estar al revés, en diagonal y entrecruzadas.

WORD LIST / LISTA DE PALABRAS

RECYCLE A process so that a material can be used again, reducing resource consumption.

RECICLAJE Es un proceso sobre un material para que pueda volver a utilizarse, lo que ayuda a reducir el consumo de recursos.

COLLABORATION Working jointly with other people.

COLABORACIÓN Trabajo hecho conjuntamente con otras personas.

FOSSIL FUELS A natural fuel, like coal, formed in the geological past from the remains of living organisms

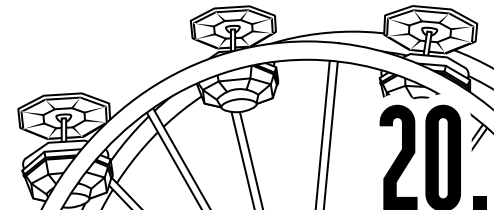

COMBUSTIBLES FÓSILES Un combustible natural, como el carbón, formado en el pasado geológico a partir de los restos de organismos vivos.

COMPOST The process of decomposition of organic waste in which plant matter is transformed into fertilizer.

ABONO Proceso de descomposición de residuos orgánicos en el que la materia vegetal se transforma en fertilizante.

CLIMATE CHANGE Change in the weather over time, some change is natural, but human action has impacted the planet.

CAMBIO CLIMÁTIC La modificación del clima. En general, se trata de cambios de orden natural, pero actualmente, se los encuentra asociados con el impacto humano sobre el planeta.
