**Subject:** SW bike path lights

To Whom etc...

I ride the SW bike path to my night shift job downtown and, as someone who has nearly taken out a few pedestrians and their hapless dogs, I am all in favor of lighting the path. I have so many blinkers and spots on my bike that I look like the 4th of July when I ride but although I am laughably visible, there's nothing more I can do to see the many dark clothed ,dark dog walking folks I pass. Scary.
