Park Development Plan Summary

Introduction

Bordner Park is part of the City of Madison's west planning area. At the time of this plan, no previous official planning documents were known to exist. The park was developed in the 1950's and some amenities were replaced in the 1990's. Aerial photography shows the park has been in its general current configuration since around 1995.

Existing Facilities

Existing park facilities include a ballfield backstop, half-court basketball court, sun shelter, tennis courts, playground, and path.

Proposed Facilities

Parks invested in replacements and upgrades to the playground and basketball court in the late 2010's. This plan does not propose new locations for any existing park features. Existing amenities should be kept on typical maintenance and replacement schedules. Recreational Biking features are proposed in the existing managed meadow areas. Connections to other recreational biking facilities in the area should be considered when developing these features.

Special Conditions

None.

Park Development Plan Summary

Introduction

Glen Oak Hills Park is part of the City of Madison’s west planning area. Glen Oak Hills Park was originally plotted in 1926. The parcel was transferred to the Town of Madison in 1946, then to the City of Madison in 1961. Prior to acquisition, the land appears to have been a forested ravine. The wooded nature of the site has been maintained since the park was acquired. A playground structure was added in 1996.

Existing Facilities

The existing park facility is a playground.

Proposed Facilities

Parks plans to invest in a replacement for the playground in the late 2020’s. This plan does not propose new locations for any existing park features. Existing amenities should be kept on typical maintenance and replacement schedules. Recreational biking features are proposed in the existing mowed turf areas. Connections to other recreational biking facilities in the area should be considered when developing these features.

Special Conditions

None.

Park Development Plan Summary

Introduction

Indian Hills Park is part of the City of Madison’s west planning area. Indian Hills Park was acquired by the City of Madison in 1955. Prior to acquisition, the land appears to have been farm land. A 1974 aerial photo shows evidence of a make-shift baseball diamond in the northeast corner of the park. Various improvements have been made over the years; the park has been in its current configuration since around 2000.

Existing Facilities

Existing park facilities include a backstop and playground with path.

Proposed Facilities

Parks invested in replacing the playground in 2018. This plan does not include any new amenities or propose new locations for any existing park features. Existing amenities should be kept on typical maintenance and replacement schedules.

Special Conditions

A sanitary sewer easement runs along the southern boundary of the park. A utility easement runs on the north side of the park.

Park Development Plan Summary

Introduction

Merrill Springs Park is part of the City of Madison's west planning area. Merrill Springs Park was acquired by the City in 1910, with an expansion to the southeast in 2012. Prior to acquisition, the land appears to have been densely forested. A 1968 aerial photo shows evidence of a sand beach and boating pier. While some improvements have been made, the park has been in its current configuration since around 1934 when the W.E.R.A.* constructed the historic stone features.

Existing Facilities

Existing park facilities include a canoe/kayak launch, community kiosk, and rentable canoe/kayak rack..

Proposed Facilities

This plan does not include any new amenities or propose new locations for any existing park features. Existing amenities should be kept on typical maintenance and replacement schedules.

Special Conditions

Merrill Springs Park features a natural, perennial spring. The masonry surrounding the spring and the stone tables were built through the 1934 *Wisconsin Emergency Recovery Act. Alterations in this park may be subject to local or state regulations due to the historic nature of several amenities.

Park Development Plan Summary

Introduction

Mineral Point Park is part of the City of Madison’s west planning area. Mineral Point Park was originally dedicated to the public in 1965 and was utilized as a landfill until approximately 1971, at which point it was capped and developed with a grant under the Federal Land and Water Conservation Fund. The City acquired additional neighboring lots and easements from 1992-1995. Prior to acquisition, the land appears to have been farm land. The City of Madison Engineering Division currently administers the land rights and improvements.

Existing Facilities

Existing park facilities include hiking paths.

Proposed Facilities

This plan does not propose new locations for any existing park features. Existing amenities should be kept on typical maintenance and replacement schedules. Recreational biking features are proposed in several areas. Connections to other recreational biking facilities in the area should be considered when developing these features. Benches are proposed as an addition along the paved multi-use trail to the north.

Special Conditions

Several utility and landfill monitoring easements exist. There are also use restrictions due to previous federal and Wisconsin DNR grant funding.

*Parkwood Hills Community Association, Parkwood West Condominium Association, Parkwood Village Homeowners Association
Board of Park Commissioners Approval: Pending

Park Development Plan Summary

Introduction

Mohican Pass Triangle Park is part of the City of Madison’s west planning area. Mohican Pass Triangle Park was acquired by the City in 1950. Prior to acquisition, the land appears to have been farm land. While some improvements have been made, the park has been in its current configuration since around 1955.

Existing Facilities

None.

Proposed Facilities

This plan does not include any new amenities or propose new locations for any existing park features. Existing amenities should be kept on typical maintenance and replacement schedules.
