Subject: RE: Tenney Park Bridge Removal/Replacement

Hello Tom,

I have received the plans you delivered yesterday. Yes, we agree that these plans represent a suitable design for a "new" replacement bridge within the Tenney Park historic district. We believe further that photo documentation of the original bridge prior to its removal is a necessary element of mitigation (for the loss of this bridge). If replacement bridge design details should change, please notify us with details for further review and comment.

Please contact me with questions. Thank you.

Sincerely,

Chip Brown
