

AFFIDAVIT OF MAILING

STATE OF WISCONSIN)
) ss.
COUNTY OF DANE)

Kathleen Rideout, being first duly sworn on oath, deposes and says that:

1. She is a Administrative Clerk I with the Office of the City Engineer, City of Madison, Dane County, Wisconsin, and did on the 4th day of February, 2011 placed in envelopes addressed to each interested owner of respective addresses as indicated by attached assessment list, a true and correct copy of the notice of assessments for the project titled E. MAIN STREET, S. SECOND STREET, AND S. FOURTH STREET ASSESSMENT DISTRICT - 2011as attached hereto.

2. She did and delivered the envelopes to the Mail Room of the Dane County Printing and Services Division, 210 Martin Luther King, Jr. Blvd., in the city of Madison, Dane County Wisconsin, for postage and depositing in the United States Mail.

Kathleen Rideout

Subscribed and sworn to before me
this 4th day February, 2011

**Re: Public Hearing before Board of Public Works
February 16, 2011 6:30 P.M.
Room 108 City-County Building
210 Martin Luther King Jr Blvd.
Madison, WI**

The City of Madison is proposing to improve S. Second St. from E. Washington Ave. to Winnebago St., E. Main St. from S. Second St. to S. Fourth St., and S. Fourth St., from E. Washington Ave. to Winnebago St.. This project involves special assessments to owners of property on the project. You are being sent this letter to notify you of the public hearing before the Board of Public Works at the above referenced date, time & location. City Engineering will be making a short presentation at the meeting, followed by the public hearing. Attached to this letter is a schedule of assessments that contains the estimated cost for each property on the project.

The proposed improvements include replacing the sanitary sewer and water mains and laterals; replacing the curb and gutter and drive aprons; replacing portions of the sidewalk and replacing the pavement. The project is scheduled to take place during the spring and summer of 2011.

Street Improvements

The proposed street improvements include replacing the concrete curb and gutter and the asphalt pavement. Sidewalk that is cracked, settled, heaved, or in disrepair will be replaced. Also, the replacement of the sanitary sewer lateral serving your property will require removal and replacement of up to four sections of sidewalk.

The City and the property owners adjoining the reconstruction will share the cost of the street improvements. The City shares the cost on a 50-50 basis with the property owners for removing and replacing drive aprons, sidewalk and curb and gutter. The City is responsible for the remaining street related items. The attached Schedule of Assessments shows a breakdown of costs for each of the assessable items and the total estimated cost to be assessed to each adjacent property owner. LeAnne Hannan is the street design engineer and you may contact her at 266-4057 or lhannan@cityofmadison.com if you have questions.

Rain Gardens

City Engineering has determined that the terraces in front of certain properties within this project are eligible for terrace rain gardens. The rain gardens would be installed by the City of Madison and assessed to the property owner at 25% of the total cost. Installing a terrace rain garden is completely voluntary for eligible property owners. A signed waiver of special assessment would be required of each participant and long-term maintenance of the garden would be the responsibility of the property owner. For more information on this portion of the project, please see the attached sheet *Opportunities for Rain Gardens*.

Sanitary Sewer Main and Lateral Replacement

The sanitary sewer main and laterals within the limits of this reconstruction project were constructed in 1909. The sanitary sewer main will be replaced with this project and will not be assessed to the properties. The property owners own the sanitary laterals from the house to the main in the street. It is the City of Madison Engineering Division's policy to pay for 75% of the cost to replace sanitary laterals, within the public right of way (that length of sewer lateral between the sanitary sewer main and the property line). The estimated property owner's share is listed on the schedule of assessments. This offer

applies only to property owners whose sewer lateral is within the street reconstruction limits. Replacement of the sanitary sewer lateral from the property line to your home is solely your responsibility and will not be coordinated or funded by the City. Lisa Coleman is the sanitary sewer designer for this project; you may contact her at 266-4093 or lcoleman@cityofmadison.com.

Storm Sewer

Storm sewer main, leads, and inlets will be replaced as part of this project. This work is not assessed to property owners. Lisa Coleman is the storm sewer designer for this project; you may contact her at 266-4093 or lcoleman@cityofmadison.com.

Impact on Trees and Landscaping

City Forestry will be evaluating trees along the project to determine condition and to determine tree protection specifications. Sewer lateral conflicts with trees will be evaluated by City Forestry and City Engineering. If any trees need to be removed prior to construction, the adjacent property owners will be notified.

Tree pruning in advance of the project is required to reduce the risk of damage to the trees during construction. The City of Madison – Forestry Section will perform the necessary work. For certain species, especially oak and elm trees, the pruning must be completed by mid-April to reduce the chance of disease.

Please note that construction will also have an impact on landscape features in the terrace. With the nature of this work, property owners should anticipate that the entire terrace area, the area between the sidewalk and the curb, will be disturbed. Therefore, any plantings or special landscaping features that an owner wishes to save from damage should be removed from the terrace area prior to the start of construction. We will try to minimize the area disturbed, along the south side of E. Main St., residents should anticipate that the area within four (4) feet of the curb will be disturbed and should avoid planting in this area.

Water Main Replacement and Lead Service Replacement

Water main will be replaced within the project limits. If you have any questions or concerns with regards to the water main work, please contact Dennis Cawley, of the Madison Water Utility, at 261-9243 or dcawley@madisonwater.org.

Assessments - General

A special assessment is a special charge for work that the City is planning to complete. The attached schedule of assessments shows an estimate of the property owners' share of the project based upon the City's assessment policy. When the project is bid, and work is complete, a final assessment will be calculated based on work actually performed. The final assessment is payable in one lump sum or over a period of 8 years, with 2.5% interest charged on the unpaid balance.

Accommodation Requests

To request accommodations for special needs or disabilities or have any other questions regarding this project, please contact the Project Engineer, LeAnne Hannan at lhannan@cityofmadison.com or 266-4057. This includes requests relating to the Public Hearing and also requests relating to the actual operations of construction.

Sincerely,

Robert F. Phillips, P.E., City Engineer

**NOTICE OF PUBLIC HEARING
BEFORE THE BOARD OF PUBLIC WORKS
FOR
PLANS, SPECIFICATIONS, AND SPECIAL ASSESSMENTS
FOR
PUBLIC WORKS IMPROVEMENTS
MADISON, WISCONSIN**

PART I

The Common Council of the City of Madison, Wisconsin, having heretofore decided that it is expedient and necessary that the improvements as listed in Part II hereof be improved at the expense of the property thereby on which would be conferred some special benefit.

NOW, THEREFORE, NOTICE IS HEREBY GIVEN:

That the City Engineer has prepared plans, specifications, a proposed schedule of assessments, and an estimate of the entire costs of the improvement for each of the districts listed in Part II hereof, and;

That the plans, specifications, a proposed schedule of assessments, and an estimate of the entire cost of the improvements listed hereto are available and open to inspection by all interested persons in the office of the City Engineer, Room 115, City-County Building, 210 Martin Luther King Jr. Blvd., between the hours of 7:30 a.m. and 4:00 p.m., Monday through Friday, and will so continue to be for ten (10) working days from the first published date of this notice, and;

That on WEDNESDAY, FEBRUARY 16, 2011, AT 6:30 P.M., the Board of Public Works will hold a public hearing in, ROOM 108 (PARKS CONFERENCE ROOM) OF THE CITY COUNTY BUILDING and will consider any objections that may be filed in writing or in person and hear all persons desiring to be heard, and;

That special assessments may be paid over an eight (8) year period or fifteen (15) year period, with the owner paying 1/8 or 1/15 of the principal each year plus two and a half (2.5%) percent interest on the unpaid balance, as determined by the Board of Public Works.

That if the total assessment is paid in full before October 31st in the year that the billing is made, irrespective of project completion, then no interest shall be charged.

The City's TDD number is (866)-704-2315

If you require an interpreter, materials in alternate formats, or other accommodations to access this public hearing, please contact the Engineering Division at phone (608) 266-4751. Please make contact at least 24 hours prior to the date of this public hearing so that we can make proper accommodations.

PART II

E. MAIN STREET, S. SECOND STREET, AND S. FOURTH STREET ASSESSMENT DISTRICT - 2011

By Order of the Board of Public Works
Madison, Wisconsin

PUB: WSJ FEBRUARY 4, 2011

Opportunities for Rain Gardens

City Engineering staff conducted a field survey of the area and has determined that this project has potential for rain gardens in specific locations along the street terrace (the area between the sidewalk and street). A rain garden is a specially designed garden that has the capability of treating stormwater. The terrace rain gardens would be about 1 foot deep in the center and capture some of the stormwater that would otherwise flow directly to the lake. The gardens remove nutrients and other pollutants from stormwater before allowing it to soak into the ground. Generally, rain gardens are planted with native vegetation, but some ornamentals will also work. A sketch of a typical terrace rain garden is included below, shown with typical dimensions.

While any homeowner can install a rain garden in their yard by digging out a shallow hole to capture stormwater, terrace rain gardens have to go one step further. We excavate out some of the existing soil, then add clear stone and a special engineered fill of topsoil, sand, and compost to ensure adequate infiltration and stormwater treatment.

The included map indicates where rain gardens could be appropriately installed. Some of the criteria City Engineering uses in determining potential sites include adequate space, distance from trees, and terrace slope. In some instances, a rain garden would fit between two properties and this is indicated on the map. In previous rain garden projects, there has been an interest in sharing a rain garden between neighbors, and so we offer this as a possibility.

Based on a similar project, we estimate the total construction cost of a terrace rain garden to be about \$1500 and installation of plants to be about \$500. City Engineering will provide 75% cost share to anyone interested in having a rain garden installed. **If you are at all interested in receiving a terrace rain garden, please contact us by March 4, 2011.** You will have to opportunity to make a final decision once we have received the bid for your individual rain garden. If we do not hear from you by this date, we will assume you are not interested in having a rain garden.

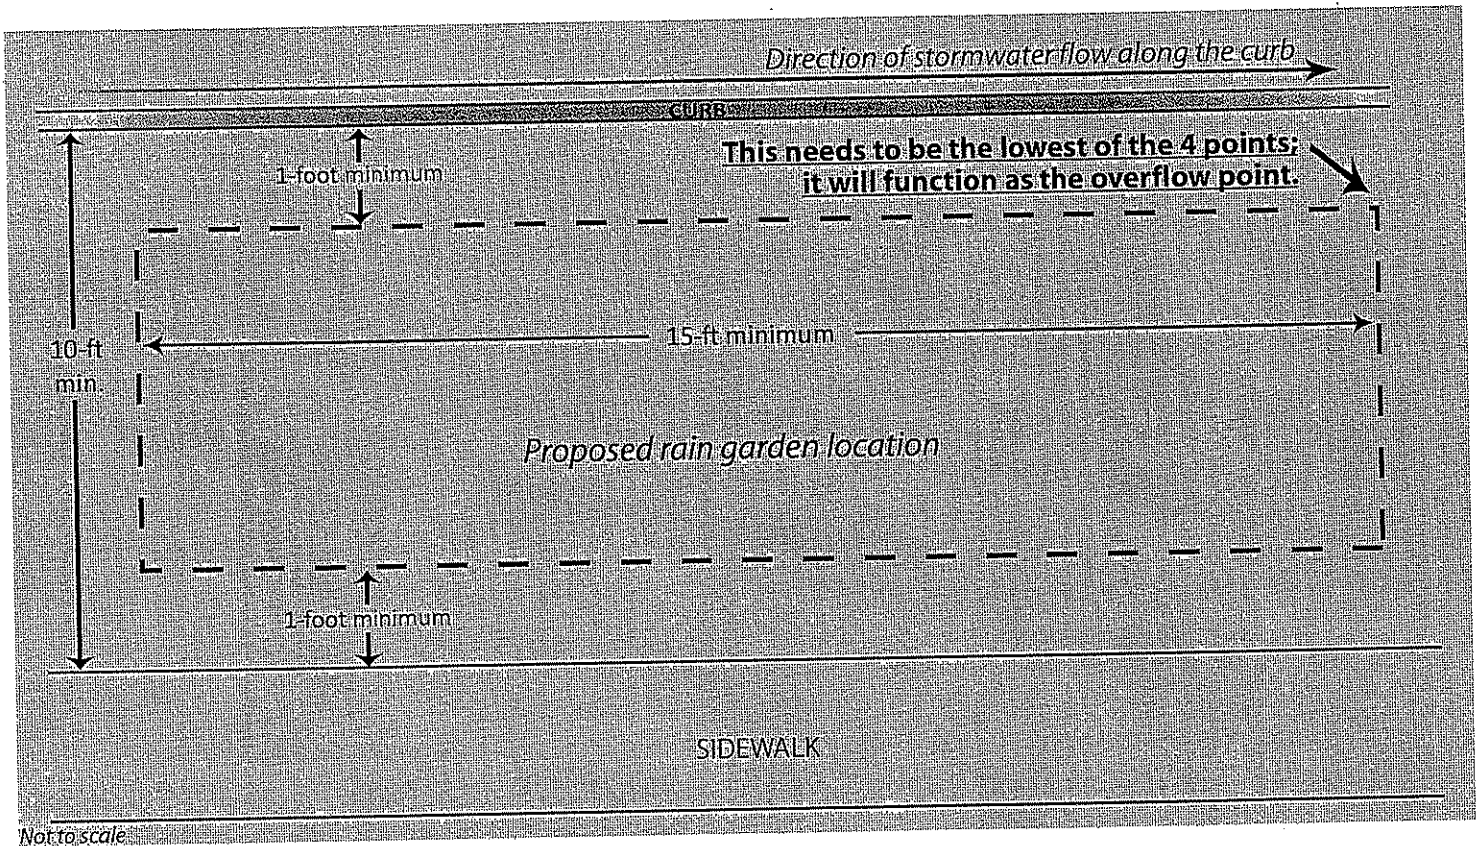

Please contact **Lisa Coleman, storm engineer for this project, at 266-4093 (lcoleman@cityofmadison.com)** to indicate your initial interest in receiving a rain garden or for any questions you may have. To find out more about rain gardens, you can visit our stormwater management website at: <http://www.cityofmadison.com/engineering/stormwater>.

Rain Gardens in the Street Terrace

Determining site suitability:

1. Terrace must be at least 10 feet wide from back of curb to edge of sidewalk
2. Rain garden will be a minimum of 15 feet long
3. Trees need to be at least 10 feet from edge of rain garden
4. Driveways and sidewalk ramps need to be at least 3 feet from edge of rain garden
5. The rain garden would need to overflow back into the curb, away from the sidewalk/house
6. The terrace cannot be too steep in either direction (lengthwise or crosswise).
7. If you are unclear as to a site's suitability, City Engineering staff will do a site visit and make a determination based on the above criteria.

More information about rain gardens can be found here:
www.cityofmadison.com/engineering/stormwater/raingardens
